QUESTION 2

HOTSPOT

You run the following PowerShell command in a Microsoft 365 environment.

Admin Centers

- The Exchange admin center from an on-premises server
- The Exchange admin center from Exchange Online
- The Microsoft 365 admin center
- The Compliance admin center

Answer Area

- User1: Admin Center
- User2: Admin Center

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the command.

NOTE: Each correct selection is worth one point.

Hot Area:

Admin Centers

- The Exchange admin center from Exchange Online
- The Microsoft 365 admin center

Answer Area

- User1: The Compliance admin center
- User2: The Exchange admin center from an on-premises server

Correct Answer:

Actions

- Use Azure Storage Explorer to upload the PST files.
- Retrieve the shared access signature (SAS) URL.
- Create a mapping file.
- Start the PST import job.
- Use AzCopy to upload the PST files.
- Create a PST import job.

Answer Area

QUESTION 3

DRAG DROP

You have a Microsoft Exchange Server 2019 organization.

You plan to implement a hybrid deployment between Exchange Online and Exchange Server.

You need to install the Exchange Online Hybrid Agent. The solution must use the principle of least privilege.

To which roles should you be assigned to perform the installation? To answer, drag the appropriate roles to the correct products. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Department	Archive	Single item recovery
Finance	Enabled	Enabled
Manufacturing	Disabled	Disabled
Sales	Disabled	Disabled
Marketing	Enabled	Enabled

Correct Answer:

Administrator	Management role group	Organization	Management role
Admin1	Organization Management, Discovery Management	Exchange Online, on-premises	None
Admin2	Organization Management, Discovery Management	Exchange Online, on-premises	Mailbox Import Export

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains the following email domains:

1.

Adatum.com

2.

Contoso.com

3.

Fabrikam.com

When external recipients receive email messages from the users in the tenant, all the messages are delivered by using the @contoso.com email domain.

You need to ensure that the users send email by using the @fabrikam.com email domain.

Solution: From the Microsoft 365 portal, you set fabrikam.com as the default domain.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/microsoft-365/admin/setup/domains-faq?view=o365-worldwide#how-do-i-set-or-change-the-default-domain-in-microsoft-365>

QUESTION 5

You have 1,000 user accounts that are each licensed for Microsoft 365. Each user account has a Microsoft Exchange Online mailbox.

Ten of the user accounts are configured as service accounts for applications. The applications send event notifications to the mailboxes of the service accounts by using SMTP. The developers of each application have delegated access to the mailbox of their respective application. You need to ensure that all the event notifications sent by the applications are retained in the service account mailboxes so that new developers can review older notifications. The developers must be able to view only the notifications for their

respective application. What should you do?

A. Replace the service account mailboxes with a single user mailbox that contains a folder for each application.

B. Replace the service account mailboxes with a single user mailbox that contains Power Automate rules.

C. Convert the service account mailboxes into shared mailboxes.

D. Convert the service account mailboxes into mail-enabled users.

Correct Answer: C
