QUESTION 1

You need to recommend changes to the existing environment to support the minimum high-availability SharePoint Server farm. The solution must minimize costs.

Which three changes should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Change the role of SPWEB1 and SPWEB2 to Front-end with Distributed Cache.

B. Change the role of SPSEARCH1 and SPSEARCH2 to Application with Search.

C. Remove SPCACHE1 and SPAPP1 from the farm.

D. Change the role of SPCACHE1 to Single-Server Farm.

E. Change the role of SPAPP1 to Single-Server Farm.

F. Remove1 SPWEB1 and SPSEARCH1 from the farm.

Correct Answer: ABC

QUESTION 2

You have a SharePoint Server farm and a SharePoint Online subscription.

You plan to configure a SharePoint hybrid environment.

You need to identify which groups and roles must be assigned to your user account to implement the deployment. The solution must use the principle of least privilege.

Which three roles and groups should you identify? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. the Farm Administrators group in SharePoint

B. the Service administrator role in Microsoft Office 365

C. the Domain Admins group in Active Directory

D. the ADSyncAdmins group in Active Directory

E. the Global administrator role in Microsoft Office 365

Correct Answer: ACE

QUESTION 4

Your company has a SharePoint Server farm.

Each department at the company has an associated Active Directory group.

You plan to deploy a Business Connectivity Services (BCS) solution for all the users in the human resources (HR) department. BCS will connect to a Microsoft SQL Server named SQL1. SQL1 uses SQL Server Authentication.

You need to ensure that BCS can access SQL1. Authentication credentials and connection information must be encrypted.

What should you do?

A. Create a target application that uses a Target Application Type of Group Ticket. Add a new field named ConnectionString and set the field type to PIN. Set the credentials for the target application.

B. Create a target application that uses a Target Application Type of Group. Add a new field named ConnectionString and set the field type to Generic. Set the credentials for the target application.

C. Create a target application that uses a Target Application Type of Individual Ticket. Add a new field named ConnectionString and set the field type to Key. Set the credentials for the target application.

D. Create a target application that uses a Target Application Type of Individual. Add a new field named ConnectionString and set the field type to PIN. Set the credentials for the target application.
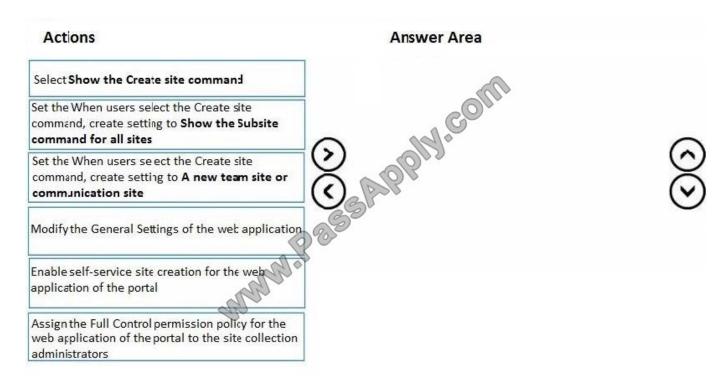

Correct Answer: B

QUESTION 5

You have a SharePoint Server farm.

You create a web application that has a URL of https://portal.contoso.com and a root site collection.

You need to ensure that site collection administrators can create new site collections directly from the root site. The new sites must use the modern user interface.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

| **Answer Area** |

Select **Show the Create site command**

Set the When users select the Create site command, create setting to **Show the Subsite command for all sites**

Set the When users select the Create site command, create setting to **A new team site or communication site**

Modify the General Settings of the web application

Enable self-service site creation for the web application of the portal

Assign the Full Control permission policy for the web application of the portal to the site collection administrators

Correct Answer:

Actions

Set the When users select the Create site command, create setting to **Show the Subsite command for all sites**

Enable self-service site creation for the web application of the portal

Assign the Full Control permission policy for the web application of the portal to the site collection administrators

Answer Area

Modify the General Settings of the web application

Select **Show the Create site command**

Set the When users select the Create site command, create setting to **A new team site or communication site**
