**QUESTION 1****HOTSPOT**

You have a Microsoft 365 tenant.

You need to retain Azure Active Directory (Azure AD) audit logs for two years. Administrators must be able to query the audit log information by using the Azure Active Directory admin center.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Save the audit logs to:

	▼
Azure Data Lake Storage Gen2	
Azure Files	
Azure Log Analytics	

Azure Active Directory admin center blade to use to view the saved audit logs:

	▼
Audit logs	
Identity Governance	
Logs	
Sign-ins	
Usage & insights	

Correct Answer:

## Answer Area

Save the audit logs to:

	▼
Azure Data Lake Storage Gen2	
Azure Files	
Azure Log Analytics	

Azure Active Directory admin center blade to use to view the saved audit logs:

	▼
Audit logs	
Identity Governance	
Logs	
Sign-ins	
Usage & insights

### QUESTION 2

You have a Microsoft 365 subscription.

You receive a General Data Protection Regulation (GDPR) request for the custom dictionary of a user.

From the Compliance admin center, you need to create a content search.

How should you configure the content search?

- A. Condition: Type Operator. Equals any of Value: Office Roaming Service
- B. Condition: Title Operator: Equals any of Value: Normal.dot
- C. Condition: Type Operator: Equals any of Value: Documents
- D. Condition: File type Operator: Equals any of Value: dic

Correct Answer: D

Since the GDPR request is related to the custom dictionary of a user, we need to search for the files that contain the user's custom dictionary. The custom dictionary files in Microsoft Word are typically saved with a ".dic" file extension.

Therefore, we should configure the content search with a condition that searches for files with the ".dic" file type.

Option A is not correct because it is searching for the Office Roaming Service, which is not related to the custom

dictionary.

Option B is not correct because it is searching for files with the "Normal.dot" file name, which is a template file and not related to the custom dictionary.

Option C is not correct because it is searching for files with the "Documents" type, which is too broad and will likely return many irrelevant results.

### QUESTION 3

#### HOTSPOT

You have a Microsoft 365 E5 subscription that contains three users named User1, User2, and User3.

You have Azure Active Directory (Azure AD) roles that have the role activation settings shown in the following table.

Name	Require justification on activation	Require approval to activate	Approver
Role1	No	Yes	User1
Role2	Yes	No	<i>Not applicable</i>

You have Azure AD roles that have the role assignment settings shown in the following table.

Name	Allow permanent eligible assignment	Allow permanent activate assignment	Require justification on active assignment
Role1	Yes	Yes	Yes
Role2	No	Yes	Yes

The Azure AD roles have eligible users assigned as shown in the following table.

Name	Eligible assignment
Role1	User1, User2
Role2	User3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

## Answer Area

Statements	Yes	No
User1 can approve his own Role1 assignment request.	<input type="radio"/>	<input type="radio"/>
User1 can approve the Role2 assignment request of User3.	<input type="radio"/>	<input type="radio"/>
User1 must provide a justification to approve the Role1 assignment request of User2.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

## Answer Area

Statements	Yes	No
User1 can approve his own Role1 assignment request.	<input type="radio"/>	<input checked="" type="radio"/>
User1 can approve the Role2 assignment request of User3.	<input type="radio"/>	<input checked="" type="radio"/>
User1 must provide a justification to approve the Role1 assignment request of User2.	<input type="radio"/>	<input checked="" type="radio"/>

1.  
(No) Approvers can't approve their own activation request.
2.  
(No) Role2 does not need approval to activate.
3.  
(No) Justification is not needed for activation approval of Role1. Justification is only needed when eligibility assignment is made with activation included(ie permanent activation).

## QUESTION 4

### HOTSPOT

You configure Microsoft Azure Active Directory (Azure AD) Connect as shown in the following exhibit.

The screenshot shows the 'Synchronization Settings' window for Microsoft Azure Active Directory Connect. The window is divided into two main sections: 'Synchronized Directories' and 'Synchronization Settings'.

**Synchronized Directories:**

DIRECTORY	ACCOUNT
Adatum.com	Adatum.com\MSQL_9c71dba7d1b9

**Synchronization Settings:**

Setting	Value
SOURCE ANCHOR	mS-DS-ConsistencyGuid
SYNC CRITERIA	AlwaysProvision
AZURE AD APP AND ATTRIBUTE FILTERING	Disabled
DIRECTORY EXTENSION ATTRIBUTE SYNC	Disabled
GROUP WRITEBACK	Disabled
PASSWORD WRITEBACK	Disabled
AUTO UPGRADE	Suspended
SQL SERVER NAME	(localdb)
USER PRINCIPAL NAME	userPrincipalName
FILTER OBJECTS TO SYNCHRONIZE BY GROUP	Disabled
DEVICE WRITEBACK	Enabled
EXCHANGE HYBRID DEPLOYMENT	Disabled
PASSWORD HASH SYNCHRONIZATION	Enabled
USER WRITEBACK	Disabled
EXCHANGE MAIL PUBLIC FOLDERS	Disabled
SQL SERVICE INSTANCE NAME	:\ADSync

At the bottom of the window, there are two buttons: 'Previous' and 'Exit'.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

If you reset a password in Azure AD, the password will [answer choice].

be overwritten	✓
be synced to Active Directory	
be subject to the Active Directory password policy	

If you join a computer to Azure AD,[answer choice].

an object will be provisioned in the Computers container	✓
an object will be provisioned in the RegisteredDevices container	
the device object in Azure will be deleted during synchronization	

Correct Answer:

### Answer Area

If you reset a password in Azure AD, the password will [answer choice].

be overwritten	✓
be synced to Active Directory	
be subject to the Active Directory password policy	

If you join a computer to Azure AD,[answer choice].

an object will be provisioned in the Computers container	✓
an object will be provisioned in the RegisteredDevices container	
the device object in Azure will be deleted during synchronization

### QUESTION 5

You have a Microsoft 365 subscription.

The Global administrator role is assigned to your user account. You have a user named Admin1.

You create an eDiscovery case named Case1.

You need to ensure that Admin1 can view the results of Case1.

What should you do first?

- A. From the Azure Active Directory admin center, assign a role group to Admin1.
- B. From the Microsoft 365 admin center, assign a role to Admin1.
- C. From Security and Compliance admin center, assign a role group to Admin1.

Correct Answer: C
