### QUESTION 1

You have a hybrid Azure Active Directory (Azure AD) tenant that has pass-through authentication enabled.

You plan to implement Azure AD identity Protection and enable the user risk policy.

You need to configure the environment to support the user risk policy.

What should you do first?

- A. Enable password hash synchronization.
- B. Configure a conditional access policy.
- C. Enforce the multi-factor authentication (MFA) registration policy.
- D. Enable the sign-in risk policy.

Correct Answer: A

---

### QUESTION 2

You have a Microsoft 365 subscription.

You need to create data loss prevention (DLP) queries in Microsoft SharePoint Online to find sensitive data stored in sites.

Which type of site collection should you create first?

- A. Records Center
- B. eDiscovery Center
- C. Enterprise Search Center
- D. Document Center

Correct Answer: B

Reference: <https://support.office.com/en-us/article/overview-of-data-loss-prevention-in-sharepoint-server-2016-80f907bb-b944-448d-b83d-8fec4abcc24c>

---

### QUESTION 3

#### HOTSPOT

You have a Microsoft 365 E5 subscription.

Users and device objects are added and removed daily. Users in the sales department frequently change their device.

You need to create three following groups:

Group	Requirement
1	All the devices of users where the Department attributes is set to Sales
2	All the devices where the Department attribute is set to Sales
3	All the devices where the deviceOwnership attribute is set to Company

The solution must minimize administrative effort.

What is the minimum number of groups you should create for each type of membership? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

Groups that have assigned membership:

	▼
0	
1	
2	
3	

Groups that have dynamic membership:

	▼
0	
1	
2	
3	

Correct Answer:

## Answer Area

Groups that have assigned membership:

	▼
0	
1	
2	
3	

Groups that have dynamic membership:

	▼
0	
1	
2	
3	

Group 1 has to be assigned because you can't create a device group based on the device owners' attributes.

Group 2 can be dynamic because a user does have a department attribute.

Group 3 can be dynamic because a device does have a deviceownership attribute.

### QUESTION 4

You have a Microsoft 365 tenant that uses Azure Information Protection to encrypt sensitive content.

You plan to implement Microsoft Defender for Cloud Apps to inspect protected files that are uploaded to Microsoft OneDrive for Business.

You need to ensure that all Azure Information Protection-protected files can be scanned by using Defender for Cloud Apps.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft Purview compliance portal, create a data loss prevention (DLP) policy that contains an exception for content that contains a sensitive information type.
- B. From the Microsoft Defender for Cloud Apps portal, enable file monitoring of software as a service (SaaS) apps.
- C. From the Microsoft Defender for Cloud Apps portal, create an OAuth app policy for apps that have the Have full access to user files permission.
- D. From the Azure Active Directory admin center, grant Microsoft Defender for Cloud Apps permission to read all the

protected content of the tenant.

Correct Answer: AD

---

### QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an on-premises Active Directory domain named contoso.com.

You install and run Azure AD Connect on a server named Server1 that runs Windows Server.

You need to view Azure AD Connect events.

Solution: You use the Application event log on Server1.

Does that meet the goal?

A. Yes

B. No

Correct Answer: A
