QUESTION 3

You have a Microsoft 365 subscription.

You receive a General Data Protection Regulation (GDPR) request for the custom dictionary of a user.

From the Compliance admin center, you need to create a content search.

How should you configure the content search?

A. Condition: Type Operator. Equals any of Value: Office Roaming Service

B. Condition: Title Operator: Equals any of Value: Normal.dot

C. Condition: Type Operator: Equals any of Value: Documents

D. Condition: File type Operator: Equals any of Value: dic

Correct Answer: D

Since the GDPR request is related to the custom dictionary of a user, we need to search for the files that contain the user\\'s custom dictionary. The custom dictionary files in Microsoft Word are typically saved with a ".dic" file extension.

Therefore, we should configure the content search with a condition that searches for files with the ".dic" file type.

Option A is not correct because it is searching for the Office Roaming Service, which is not related to the custom

dictionary.

Option B is not correct because it is searching for files with the "Normal.dot" file name, which is a template file and not related to the custom dictionary.

Option C is not correct because it is searching for files with the "Documents" type, which is too broad and will likely return many irrelevant results.
