### QUESTION 1

You are developing a SharePoint Framework (SPFx) web part. The web part will call a backend API that is secured by using Azure Active Directory (Azure AD). The web part will be on a page that has many other web parts. Which type of web part should you use to ensure that access to the API is exclusive to the web part?

- A. isolated
- B. SharePoint-hosted
- C. provider-hosted
- D. connected

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/sharepoint/dev/spfx/web-parts/isolated-web-parts>

---

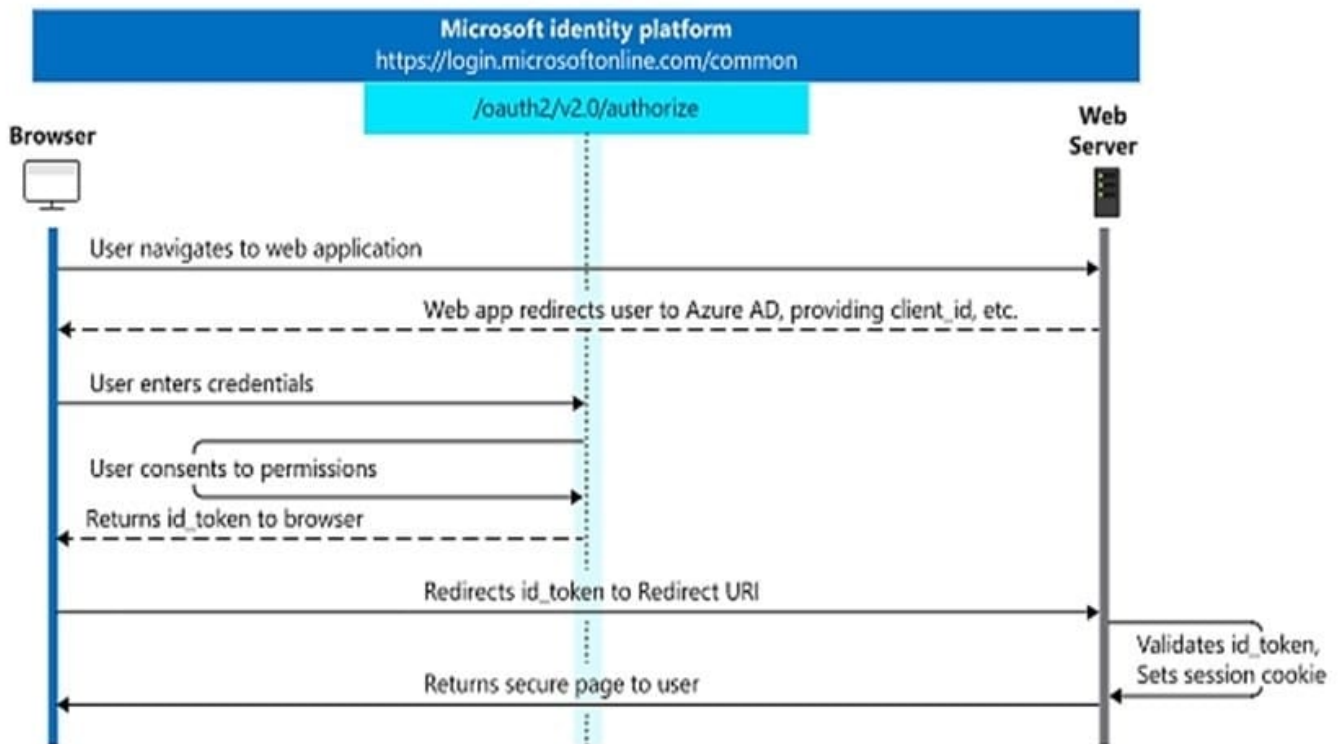

### QUESTION 2

You need to develop a server-based web app that will be registered with the Microsoft identity platform. The solution must ensure that the app can perform operations on behalf of the user? Which type of authorization flow should you use?

- A. authorization code
- B. refresh token
- C. resource owner password
- D. device code

Correct Answer: A

In web server apps, the sign-in authentication flow takes these high-level steps:

A picture containing table

Description automatically generated

You can ensure the user's identity by validating the ID token with a public signing key that is received from the Microsoft identity platform endpoint. A session cookie is set, which can be used to identify the user on subsequent page requests.

In addition to simple sign-in, a web server app might need to access another web service, such as a REST API. In this case, the web server app engages in a combined OpenID Connect and OAuth 2.0 flow, by using the OAuth 2.0

authorization code flow.

### QUESTION 3

Your company has a sales system that emails an alert to all the members of the sales department when a new sale is made.

You need to ensure that a notification is posted to a team channel when a new sale is made. The solution must minimize development effort.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Post JSON to the webhook URL from the existing sales system.
- B. Set the configurationUrl property of a connector in the manifest.

- C. Post XML to the webhook URL from the existing sales system.
- D. Get an incoming webhook for the channel.

Correct Answer: AD

Reference: <https://docs.microsoft.com/en-us/microsoftteams/platform/webhooks-and-connectors/how-to/add-incoming-webhook>

#### QUESTION 4

##### HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

##### Answer Area

Statements	Yes	No
You can use the JavaScript API for Microsoft Office to create a tab in Microsoft Teams.	<input type="checkbox"/>	<input type="checkbox"/>
You can use the JavaScript API for Microsoft Office to create a content add-in in Microsoft Excel.	<input type="checkbox"/>	<input type="checkbox"/>
You can use the JavaScript API for Microsoft Office to create a task pane add-in in Microsoft PowerPoint.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

##### Answer Area

Statements	Yes	No
You can use the JavaScript API for Microsoft Office to create a tab in Microsoft Teams.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
You can use the JavaScript API for Microsoft Office to create a content add-in in Microsoft Excel.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
You can use the JavaScript API for Microsoft Office to create a task pane add-in in Microsoft PowerPoint.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Box 1: Yes

As part of your app you can add custom tabs to embed your own web content in Teams, and using the Teams JavaScript client SDK, add Teams-specific functionality to your web content.

Box 2: Yes

You can use the Office JavaScript API to create task pane or content add-ins for Office 2013 host applications.

Box 3: Yes

You can use the Office JavaScript API to create task pane or content add-ins for Office 2013 host applications.

Reference: <https://docs.microsoft.com/en-us/microsoftteams/platform/tabs/what-are-tabs>

<https://docs.microsoft.com/en-us/office/dev/add-ins/develop/support-for-task-pane-and-content-add-ins>

---

### QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct-

For a Microsoft Office Add-in, you set the icon in the Microsoft SharePoint app catalog.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. a JSON manifest file
- C. the Office app catalog
- D. an XML manifest file

Correct Answer: D
