QUESTION 5

SIMULATION Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time. When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality

(e.g. copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words it doesn\'t matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But you should manage your time appropriately to ensure that you are

able to complete the lab(s) and all other sections of the exam in the time provided.

Please not that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab.

Task 11

You need to restrict external Teams communication for both calling and personal chat to only organizational users that use the microsoft.com domain.

To complete this task, sign in to the Microsoft 365 portal.

Correct Answer: Check the answer in explanation.

Explanation:

Manage external meetings and chat in Microsoft Teams

Allow or block domains

If you add blocked domains, all other domains will be allowed; and if you add allowed domains, all other domains will be blocked. The exception to this rule is if anonymous participants are allowed in meetings.

Using the Microsoft Teams admin center to allow specific domains

In the Teams admin center, go to Users > External access.

Under Choose which domains your users have access to, choose Allow only specific external domains.

Select Allow domains.

In the Domain box, type the domain that you want to allow, in this case microsoft.com, and then click Done.

If you want to allow another domain, click Add a domain.

Click Save.
