QUESTION 1

DRAG DROP

You are a Microsoft 365 administrator for a company.

You need to recommend an-appropriate Microsoft Office 365 plan for a customer that minimizes costs.

Which subscription plans should you recommend? To answer, drag the appropriate plans to the correct features. Each plan may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

Office 365 plans	Office 365 feature	Office 365 plan
ProPlus	Local copy of Microsoft Outlook that connects to an Exchange Server instance.	Office 365 plan
Enterprise E1	Search and discovery with Delve.	Office 365 plan
Enterprise E3	eDiscovery with in-pace, hold, and export	Office 365 plan
Enterprise E5	Advanced eDiscovery with in-place search, hold, export, and analytics.	Office 365 plan

Correct Answer:

Office 365 plans	Office 365 feature	Office 365 plan
	Local copy of Microsoft Outlook that connects to an Exchange Server instance.	ProPlus
	Search and discovery with Delve.	Enterprise E1
	eDiscovery with in-pace, hold, and export	Enterprise E3
	Advanced eDiscovery with in-place search, hold, export, and analytics.	Enterprise E5

QUESTION 2

You need to consider the underlined segment to establish whether it is accurate.

You are a Microsoft 365 administrator for a company whose employees are allowed to access corporate information located in the cloud via their personal devices.

You have been tasked with making sure that employees are prohibited from copying this information to their personal

OneDrive folders.

You should make use of Intune App Protection.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required

B. Information Rights Management

C. Microsoft Azure AD Privilege Identity Protection

D. Microsoft Azure AD Identity Protection

Correct Answer: A

QUESTION 3

You are the Microsoft 365 administrator for a company. You deploy Windows 10 to all devices by using Windows Autopilot.

You need to ensure that employees can install Microsoft Office 365 ProPlus on their devices.

What are two possible ways to achieve this goal? Each correct answer presents a part of a solution.

NOTE: Each correct selection is worth one point.

A. Use the self-install option on the Office 365 dashboard

B. Download and install the Office ProPlus Windows Installer (MSI) package

C. Enable auto-deployment of Office 365 apps for all devices

D. Update the Windows AutoPilot deployment profile to include the Office 365 apps

Correct Answer: AC

Deploy from a local source with Configuration Manager: Manage your deployment with Configuration Manager, and download and deploy Office from distribution points on your network.

Deploy from the cloud with the Office Deployment Tool: Manage your deployment with the ODT, and install Office on client devices directly from the Office CDN.

Deploy from a local source with the Office Deployment Tool: Manage your deployment with the ODT, and download and deploy Office from a local source on your network.

Self-install from the cloud: Manage your deployment from the Office portal and have your users install Office on their client devices directly from the portal.

QUESTION 4

A company uses Microsoft cloud services.

The company needs to protect against security breaches.

You need to follow Microsoft\\'s approach to security.

Which approach should you use?ld you use?

A. Will never breach security of specific applications

B. Will never breach the perimeter network

C. Will never breach security

D. Will only breach the perimeter network

E. Will breach security

Correct Answer: E

Zero Trust - Assume breach

Minimize blast radius and segment access. Verify end-to-end encryption and use analytics to get visibility, drive threat detection, and improve defenses.

Zero Trust defined

Instead of assuming everything behind the corporate firewall is safe, the Zero Trust model assumes breach and verifies each request as though it originates from an open network. Regardless of where the request originates or what resource

it accesses, Zero Trust teaches us to "never trust, always verify." Every access request is fully authenticated, authorized, and encrypted before granting access. Microsegmentation and least-privilege access principles are applied to minimize

lateral movement. Rich intelligence and analytics are utilized to detect and respond to anomalies in real time.

Reference:

https://www.microsoft.com/en-us/security/business/zero-trust and infrastructure. These layers can include things like user authentication and authorization, firewalls, malware protection, encryption, and more. By implementing these layers of

security, the company can greatly reduce the chances of a successful breach.

QUESTION 5

DRAG DROP

A company plans to deploy Microsoft 365.

You need to identify differences between the features in Exchange Online and Exchange Server.

Match the appropriate features to the corresponding supported environments. To answer, drag the appropriate environments to the correct features. Each environment may be used once, more than once, or not at all. You may need to drag

the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Supported environments

Exchange Server only

Exchange Online only

Exchange Server and Exchange Online

Feature	Supported environments
Exchange Web Services (EWS) access to accounts	Supported environment
Custom EWS throttling settings	Supported environment
Information rights management, archiving, and legal holds	Supported environment

Correct Answer:

Supported environments

Exchange Server only

Exchange Online only

Exchange Server and Exchange Online

Feature	Supported environments
Exchange Web Services (EWS) access to accounts	Exchange Server and Exchange Online
Custom EWS throttling settings	Exchange Server only
Information rights management, archiving, and legal holds	Exchange Server and Exchange Online
