QUESTION 1

The embryonic period during pregnancy takes place from _____.

- A. weeks 1 to 12
- B. weeks 1 to 10
- C. weeks 3 to 5
- D. weeks 6 to 10

Correct Answer: D

The embryonic period begins around week 6, following the ovulation period of weeks 1 to 2 and the cell division and implantation period from weeks 3 to 5.

The first trimester runs from week 1 until week 12.

QUESTION 2

Which of the following statements by a client indicates adequate preparation for magnetic resonance imaging?

- A. "I can leave my metal jewelry on during the test."
- B. "I need to wear earplugs during the test."
- C. "I can have the test even though I have a pacemaker."
- D. "I can have the test even though I have an artificial hip."

Correct Answer: B

Due to the loud noises from the scanner moving to obtain images, earplugs need to be worn. No metal objects are allowed, including jewelry, pacemakers, and artificial joints.

QUESTION 3

A client with dumping syndrome should _____ while a client with GERD should _____.

- A. sit up 1 hour after meals; lie flat 30 minutes after meals
- B. lie down 1 hour after eating; sit up at least 30 minutes after eating
- C. sit up after meals; sit up after meals
- D. lie down after meals; lie down after meals

Correct Answer: B

Clients with dumping syndrome should lie down after eating to decrease dumping syndrome. GERD clients should sit up

to prevent backflow of acid into the esophagus.

QUESTION 4

Which direction given to the nursing assistant is most likely to accomplish the task of getting a urine specimen delivered to the lab immediately after collection?

- A. "Make it a stat delivery."
- B. "Please do it as soon as you can after break."
- C. "This client is delirious, and we're worried about a urinary sepsis."
- D. "Take this client to the bathroom now and collect a urine specimen from this voiding. Take the specimen to the lab immediately."

Correct Answer: D

Effective delegation depends on clear, concise direction that leaves no room for question or interpretation on the part of the one being delegated to. Nursing assistants have a limited understanding of medical conditions and terminology, and should not be relied on to prioritize such tasks.

QUESTION 5

The LPN is teaching a first-time mother about breastfeeding her infant, who was born that day.

Which statement, if made by the mother, would reflect that the teaching had been successful?

- A. "My baby should be nursing 8-12 times a day during this period."
- B. "My baby should be having at least 4-6 wet diapers a day until 1 month."
- C. "It's nice that breastfed babies eat a bit less than formula fed babies."
- D. "I'm a little nervous about my milk coming in tomorrow. I've heard it's uncomfortable."

Correct Answer: A
