### QUESTION 1

A mother brings her 1-year-old child to the clinic. The child has no record of previous immunizations, and the mother confirms the child has not been immunized.

Which of the following should include teaching by the nurse?

- A. Immunizations may be started at any age.
- B. The recommended immunization schedule must be followed exactly.
- C. If a primary series of immunizations is interrupted, the series must be restarted.
- D. This child is at increased risk for reaction to the vaccines, when they are started.

Correct Answer: A

While a recommended immunization schedule exists, immunizations may be started at any age.

An interrupted series may be continued and need not be restarted.

There is no increased risk for reaction to vaccines due to delay.

---

### QUESTION 2

Which of the following foods needs to avoid a client with urinary tract calculi?

- A. lettuce
- B. cheese
- C. apples
- D. broccoli

Correct Answer: B

The client with urinary tract calculi needs to avoid cheese, which has high calcium content. The other foods do not.

---

### QUESTION 3

A client asks a nurse working in a dental office what type of drug the dentist uses to provide anesthesia during the extraction of the client's wisdom teeth. The dentist uses an anesthetic gas, also known as laughing gas.

This agent is \_\_\_\_\_.

- A. nitrous oxide
- B. nitrogen
- C. nitric oxide

D. nitrogen dioxide

Correct Answer: A

Nitrous oxide produces analgesia and is often used for minor surgery and dental procedures that do not require loss of consciousness. It can also produce a mild euphoria in some clients. Nitrogen is a nonmetallic element that constitutes nearly four-fifths of the air by volume, occurring as a colorless, odorless, almost inert diatomic gas, N<sub>2</sub>, in various minerals and in all proteins.

Nitric oxide is a potent vasodilator of vascular smooth muscle. It is produced from L arginine.

Nitrogen dioxide is a poisonous brown gas, NO<sub>2</sub>, often found in smog and automobile exhaust fumes.

---

#### QUESTION 4

A nurse notes that an elderly client suddenly does not keep appointments and is not wearing appropriate clothing.

Which statement by the client raises the suspicion of financial abuse?

- A. "I am having difficulty paying for this new antibiotic the physician prescribed."
- B. "I am a little short on cash since my daughter moved in to help me."
- C. "I have not felt like shopping since the weather has gotten worse."
- D. "People do not realize how difficult it is to make ends meet on a fixed income."

Correct Answer: B

Elderly clients on fixed incomes have difficulty meeting new expenses, such as medicine.

Signs of financial abuse include unexplained illnesses that are left untreated, an inability to pay rent or purchase clothes and food, and inaccurate knowledge about finances.

Financial abuse is a form of elder abuse and requires investigation.

---

#### QUESTION 5

Laboratory tests reveal the following electrolyte values for Mr. Smith: Na 135 mEq/L, Ca 8.5 mg/dL, Cl 102 mEq/L, and K 2.0 mEq/L.

Which of the following values should the nurse report to the physician because of its potential risk to the client?

- A. Ca
- B. K
- C. Na

D. Cl

Correct Answer: B

Normal serum potassium level ranges between 3.5 and 5.5 mEq/L. The levels in choices 1, 3, and 4 are within normal ranges.
