Correct Answer: CDE

Explanation: https://portal.nutanix.com/page/documents/details?targetId=Prism-Central-Guide-Prism-v5_10:mul-pc-install-scratch-c.html

QUESTION 2

An administrator adds a node with older generation processors to an existing AHV cluster with newer generation processors. What is the effect on live migration?

A. Live migration continues to function as expected and VMs can move to any AHV host.

B. Live migration is prevented until the administrator enables the legacy migration option.

C. Live migration is prevented until the administrator manually changes the newer processor level.

D. Live migration of VMs is prevented between newer and older processors.

Correct Answer: D

QUESTION 3

An administrator has just executed a maintenance window for some applications running on their nutanix cluster. After completing the maintenance, they want to assess the health of the cluster and make sure that there is no impact during the maintenance.

Which three dashboards in prism will assist the administrator in making this determination? (Choose Three)

A. Data Protection

B. Cluster Health

C. Tasks

D. Alerts

E. Analysis

Correct Answer: ABD

QUESTION 4

Which data savings technique utilizes stripes and parity calculation in a Nutanix cluster?

A. Compression

B. Parity strip

C. Erasure coding

D. Deduplication

Correct Answer: C

QUESTION 5

Which process should a cluster administrator follow to determine the uplink bond configuration node?

A. Log into the Nutanix CVM and execute the command manage_ovs_update_uplinks

B. Log into the Nutanix AHV host and execute the command ovs-appctl bond.show

C. Log into the Nutanix AHV host and execute the command ifconfig br0

D. Log into the Nutanix CVM and execute the command ovs-vsctl show

Correct Answer: B
