QUESTION 1

CPU utilization climbs above 90% on several VMs. This causes performance degradation for a business-critical application. How can alerts be configured to notify the administrator before VM CPU utilization hits 90%?

- A. On a CVM, use ncli to set the VM CPU Check threshold for the critical VMs to a value below 90%.
- B. On the Health dashboard, locate the VM CPU Check and lower the alert threshold below 90%.
- C. On a CVM, configure a cron job to run the VM CPU Check more frequently and email the result.
- D. On the Alerts dashboard, ensure that the VM CPU usage alert is not set to auto-resolve.

Correct Answer: B

QUESTION 2

An administrator receives an alert email that indicates that a health check has failed. Which action should the administrator take to collect more information on the failed check?

- A. In the Prism Web Console, select the URL included in the check details
- B. Re-run the check from the CVM CLI using the ncc command
- C. Forward the alert email to Nutanix Support requesting more information
- D. Use the ncli command on the CVM to view the details of the check

Correct Answer: B

QUESTION 3

Which two levels of encryption are supported in a Nutanix cluster running third-party hypervisor? (Choose two.)

- A. Node
- B. Cluster
- C. Container
- D. VM

Correct Answer: BC

QUESTION 4

Where should an administrator unregister Prism Element from Prism Central?

- A. From a Host SSH session
- B. From the Prism Central web console
- C. From the Prism Element web console
- D. From a CVM SSH session

Correct Answer: D

QUESTION 5

An administrator responsible for a VDI environment needs to investigate reports of slow logins. The administrator finds that increasing the number of vCPUs from 2 to 4 will reduce the login times. Production workloads are consuming 75% of the host CPU on the cluster. The administrator increases the vCPU count on all of the VDI VMs.

What are two impacts on the cluster? (Choose two)

- A. Increasing CPU counts will decrease memory utilization
- B. Increase memory utilization%
- C. Increase CPU utilization%
- D. Increase CPU ready%

Correct Answer: AB
