QUESTION 1

You are transporting a trauma patient, and notice their condition starts to deteriorate. What do you do?

- A. Stop the ambulance and begin CPR
- B. Tell your partner to drive faster; you need to get this patient to the hospital now
- C. Reassess your patient
- D. Call medical control

Correct Answer: C

Any time you have a patient whose condition worsens, you should always reassess them.

QUESTION 2

Anaphyltic shock is a form of distributive shock where the blood vessels _____?

- A. Militate
- B. Constrict
- C. Leak
- D. Semipermeable

Correct Answer: A

Due to the chemical release from the immune system bronchioles constrict and blood vessels to dilate dropping the blood pressure. Capillaries become permeable and leak a little causing hives to form on the skin. Distributive shock is difficult to recognize in the field, heart rate remains relatively low, skin is flushed due to the dilatation of the blood vessels.

QUESTION 3

Expansion of the stomach caused by too forceful ventilation pressures, which causes excess air to enter the stomach instead of the lungs.

- A. Inflation
- B. Gastric Distention
- C. Gastric Bypass
- D. Evisceration

Correct Answer: B

Gastric Distention should be avoided as it often leads to vomiting and aspiration of said emesis.

QUESTION 4

A medical condition where the patient some times suffers convulsions or seizure activity?

- A. Postictal state
- B. Tonic-clonic
- C. Focal motor
- D. Epilepsy

Correct Answer: D

Epilepsy is medical conditon where the patient often suffers seizures. Tonic-clonic and focal motor are types of seizure activity and a postictal state is the period of time after a seizure where the patient is slow to respond and is possibly unresponsive where the brain is resetting and resting.

QUESTION 5

Your neuro assessment of an unresponsive patient reveals pin point pupils. What is your primary field diagnosis?

- A. Beta blocker overdose
- B. Insulin overdose
- C. Aspirin
- D. Narcotic

Correct Answer: D

Narcotics will cause pupils to constrict making them the classic pin point. All of the other medications mentioned here does not affect the pupils, they may very well cause an altered mental status.
