QUESTION 1

While testing a recently installed FAS8700 cluster, a node fails. You now need to replace the impaired node.

In this scenario, which two statements are true? (Choose two.)

- A. You must move the boot device from the impaired node to the replacement node.
- B. The boot device must remain intact and must not be removed from the impaired node.
- C. You can change any drives or disk shelves as part of this replacement procedure.
- D. A controller model of the same type must be used to replace the impaired node.

Correct Answer: AD

A customer has two Cisco 40GbE data switches. They want to connect the switches to an AFF A400 HA pair. The switches and the AFF A400 are approximately seven meters apart.

Referring to the exhibit, which two supported actions would allow you to accomplish this task? (Choose two.)

- A. Relocate the switches or the AFF A400 so that the distance is less than five meters.
- B. Install 10 meter NetApp supported copper cables.
- C. Change the requirement for Ethernet cables.
- D. Change the requirement for optical cables.

Correct Answer: BC
