#### QUESTION 4

What does FortiClient do as a fabric agent? (Choose two.)

- A. Provides IOC verdicts
- B. Automates Responses
- C. Creates dynamic policies
- D. Provides application inventory

Correct Answer: CD

FortiClient, as a fabric agent, does not provide IOC verdicts. The role of providing IOC (Indicators of Compromise) verdicts is typically performed by other security solutions or systems that specialize in threat detection and analysis.

Similarly, FortiClient, as a fabric agent, does not have the capability to automate responses. While FortiClient can trigger alerts or notifications based on security events, the automation of responses typically requires integration with a Security Orchestration, Automation, and Response (SOAR) platform or similar systems.
