QUESTION 1

An administrator run the reload failure command: diagnose test deploymanager reload config on FortiManager. What does this command do?

- A. It downloads the latest configuration from the specified FortiGate and performs a reload operation on the device database.
- B. It installs the latest configuration on the specified FortiGate and update the revision history database.
- C. It compares and provides differences in configuration on FortiManager with the current running configuration of the specified FortiGate.
- D. It installs the provisioning template configuration on the specified FortiGate.

Correct Answer: A

QUESTION 2

An administrator would like to create an SD-WAN using central management. What steps does the administrator need to perform to create an SD-WAN using central management?

- A. First create an SD-WAN firewall policy, add member interfaces to the SD-WAN template and create a static route
- B. You must specify a gateway address when you create a default static route
- C. Remove all the interface references such as routes or policies
- D. Enable SD-WAN central management in the ADOM, add member interfaces, create a static route and SD-WAN firewall policies.

Correct Answer: D

QUESTION 3

Which of the following statements are true regarding SD-WAN Central Management? (Choose three.)

- A. SD-WAN must be enabled on per-ADOM basis
- B. SD-WAN settings can be installed on multiple FortiGate devices at the same time
- C. You can create multiple SD-WAN interfaces per VDOM
- D. When you configure an SD-WAN, you must specify at least two member interfaces.
- E. The first step in creating an SD-WAN using FortiManager is to create two SD-WAN firewall policies.

Correct Answer: BCD

QUESTION 4

An administrator, Trainer, who is assigned the Super_User profile, is trying to approve a workflow session that was submitted by another administrator, Student. However, Trainer is unable to approve the approving a workflow session?

Session List
