QUESTION 1

While reviewing logs, an administrator discovered that an incoming email was processed using policy IDs:

0:4:9.

Which of the following statements are true? (Choose two.)

A.

FortiMail applied the default behavior for relaying inbound email

B.

FortiMail configuration is missing an access delivery rule to process incoming email

C.

Incoming recipient policy ID 9 has the exclusive flag set

D.

Email was processed using IP policy ID 4

Correct Answer: AC

QUESTION 2

What are the configuration steps to enable DKIM signing for outbound messages on FortiMail? (Choose three.)

A. Enable DKIM signing for outgoing messages in a matching session profile

B. Publish the public key as a TXT record in a public DNS server

C. Enable DKIM check in a matching session profile

D. Enable DKIM check in a matching antispam profile

E. Generate a public/private key pair in the protected domain configuration

Correct Answer: ACE

QUESTION 3

An organization has different groups of users with different needs in email functionality, such as address book access, mobile device access, email retention periods, and disk quotas. Which FortiMail feature specific to server mode can be used to accomplish this?

A. Resource profiles

B. Address book management options

- C. Access profiles
- D. Domain-level service settings

Correct Answer: D

QUESTION 4

A FortiMail administrator is investigating a sudden increase in DSNs being delivered to the protected domain for undeliverable email messages. After searching the logs, the administrator identifies that the DSNs were not generated as a result of any outbound email sent from the protected domain. Which FortiMail antispam technique can the administrator use to prevent this scenario? (Choose one.)

- A. Bounce address tag validation
- B. Spam outbreak protection
- C. Spoofed header detection
- D. FortiGuard IP Reputation

Correct Answer: B

QUESTION 5

Examine the FortiMail user webmail interface shown in the exhibit; then answer the question below.

Which one of the following statements is true regarding this server mode FortiMail's configuration?

- A. The protected domain-level service settings have been modified to allow access to the domain address book
- B. This user's account has a customized access profile applied that allows access to the personal address book
- C. The administrator has not made any changes to the default address book access privileges
- D. The administrator has configured an inbound recipient policy with a customized resource profile

Correct Answer: A
