QUESTION 1

In Reverse proxy mode, how does FortiWeb handle traffic that does not match any defined policies?

A. Non-matching traffic is allowed

B. non-Matching traffic is held in buffer

C. Non-matching traffic is Denied

D. Non-matching traffic is rerouted to FortiGate

Correct Answer: C
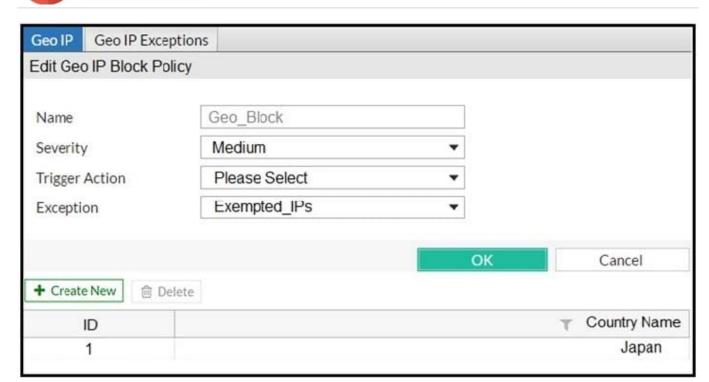

QUESTION 2

How does an ADOM differ from a VDOM?

A. ADOMs do not have virtual networking

B. ADOMs improve performance by offloading some functions.

C. ADOMs only affect specific functions, and do not provide full separation like VDOMs do.

D. Allows you to have 1 administrator for multiple tenants

Correct Answer: A

QUESTION 3

Refer to the exhibit.

FortiWeb is configured to block traffic from Japan to your web application server. However, in the logs, the administrator is seeing traffic allowed from one particular IP address which is geo-located in Japan. What can the administrator do to solve this problem? (Choose two.)

A. Manually update the geo-location IP addresses for Japan.

B. If the IP address is configured as a geo reputation exception, remove it.

C. Configure the IP address as a blacklisted IP address.

D. If the IP address is configured as an IP reputation exception, remove it.

Correct Answer: BC

QUESTION 4

You are using HTTP content routing on FortiWeb. Requests for web app A should be forwarded to a cluster of web servers which all host the same web app. Requests for web app B should be forwarded to a different, single web server.

Which is true about the solution?

A. Static or policy-based routes are not required.

B. To achieve HTTP content routing, you must chain policies: the first policy accepts all traffic, and forwards requests for web app A to the virtual server for policy A. It also forwards requests for web app B to the virtual server for policy B. Policy A and Policy B apply their app-specific protection profiles, and then distribute that app\\'s traffic among all members of the server farm.

C. You must put the single web server into a server pool in order to use it with HTTP content routing.

D. The server policy applies the same protection profile to all its protected web apps.

Correct Answer: B

QUESTION 5

How does offloading compression to FortiWeb benefit your network?

A. free up resources on the database server

B. Free up resources on the web server

C. reduces file size on the client\\'s storage

D. free up resources on the FortiGate

Correct Answer: B
