QUESTION 1

A wireless network in a school provides guest access using a captive portal to allow unregistered users to self-register and access the network. The administrator is requested to update the existing configuration to provide captive portal authentication through a secure connection (HTTPS) to protect and encrypt guest user credentials after they receive the login information when registered for the first time.

Which two changes must the administrator make to enforce HTTPS authentication? (Choose two.)

- A. Provide instructions to users to use HTTPS to access the network.
- B. Create a new SSID with the HTTPS captive portal URL.
- C. Enable Redirect HTTP Challenge to a Secure Channel (HTTPS) in the user authentication settings
- D. Update the captive portal URL to use HTTPS on FortiGate and FortiAuthenticator

Correct Answer: BD

QUESTION 2

Refer to the exhibit.

Examine the network topology shown in the exhibit.

Which port should have root guard enabled?

- A. FortiSwitch A, port2
- B. FortiSwitch A, port1
- C. FortiSwitch B, port1
- D. FortiSwitch B, port2

Correct Answer: A

QUESTION 3

Examine the following RADIUS configuration:

```
config user radius
  edit "FAC-Lab"
    set server "10.0.1.150"
    set secret ENC XXX
    set nas-ip 10.1.0.254
  next
```

An administrator has configured a RADIUS server on FortiGate that points to FortiAuthenticator. FortiAuthenticator is acting as an authentication proxy and is configured to relay all authentication requests to a remote Windows AD server using LDAP.

While testing the configuration, the administrator notices that the diagnose test authservercommand works with PAP, however, authentication requests fail when using MSCHAPv2.

Which two changes should the administrator make to get MSCHAPv2 to work? (Choose two.)

- A. Force FortiGate to use the PAP authentication method in the RADIUS server configuration.
- B. Change the remote authentication server from LDAP to RADIUS on FortiAuthenticator.
- C. Use MSCHAP instead of using MSCHAPv2
- D. Enable Windows Active Directory Domain Authentication on FortiAuthenticator to add FortiAuthenticator to the Windows domain.

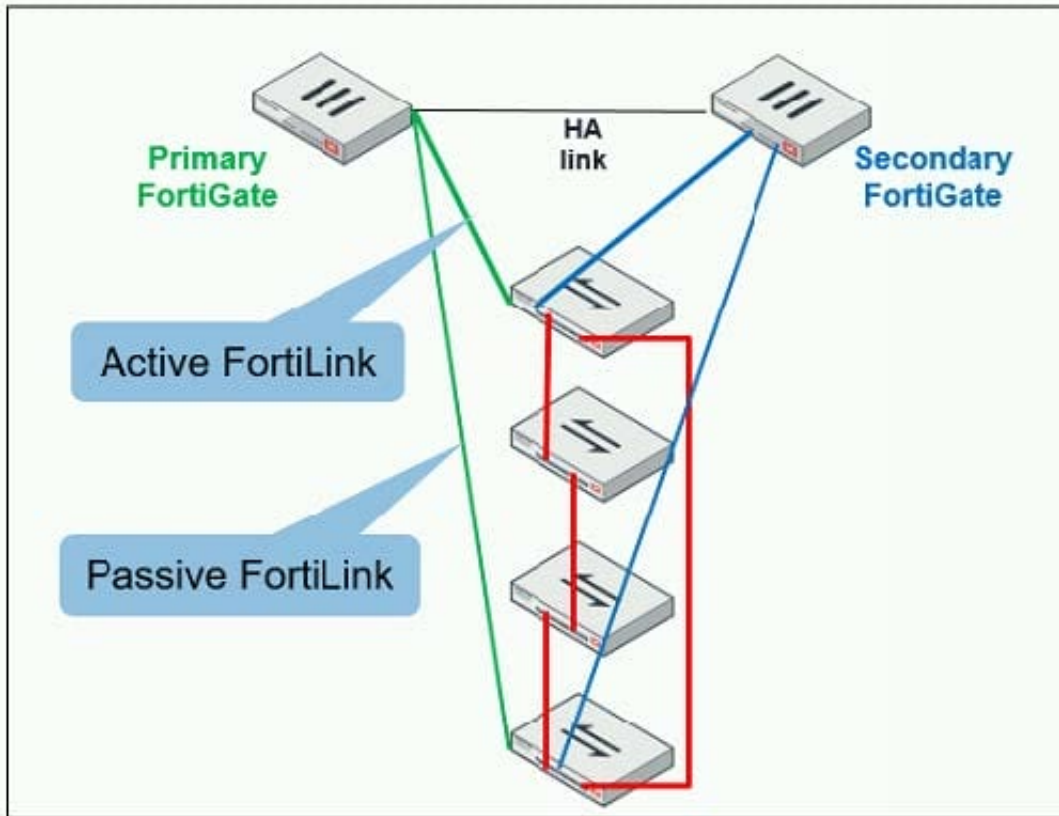

Correct Answer: BD

QUESTION 4

Refer to the exhibit.

The exhibit shows two FortiGate devices in active-passive HA mode, including four FortiSwitch devices connected to a ring.

Which two configurations are required to deploy this network topology? (Choose two.)

- A. Configure link aggregation interfaces on the FortiLink interfaces.
- B. Configure the trunk interfaces on the FortiSwitch devices as MLAG-ISL.
- C. Enable `fortilink-split-interface` on the FortiLink interfaces.
- D. Enable STP on the FortiGate interfaces.

Correct Answer: CD

QUESTION 5

An administrator has deployed dual band-capable wireless APs in a wireless network. Multiple 2.4 GHz wireless clients are connecting to the network, and subsequent monitoring shows that individual AP

2.4GHz interfaces are being overloaded with wireless connections. Which configuration change would best resolve the overloading issue?

- A. Configure load balancing AP handoff on both the AP interfaces on all APs.
- B. Configure load balancing AP handoff on only the 2.4GHz interfaces of all Aps.
- C. Configure load balancing frequency handoff on both the AP interfaces.

D. Configure a client limit on the all AP 2.4GHz interfaces.

Correct Answer: C
