QUESTION 1

Which part of the pancreas functions as the endocrine system of the organ?

- A. Gall bladder
- B. Islets of Langerhans
- C. Islets of Granada
- D. Calyx
- E. Hilum

Correct Answer: B

Islets of Langerhans contain the alpha and beta cells, responsible for releasing the hormones glucagon and insulin, respectively.

QUESTION 2

A store has a series of sales. In August, all items are reduced to 50%. In September, all items are reduced an additional 30%. If an item was \$140 back in July, how much would the item be in September?

- A. \$49
- B. \$70
- C. \$35
- D. \$30
- E. \$77

Correct Answer: A

Starting out with \$140, taking 50% off (or simply doing 140×0.5) gives us \$70.

Taking an ADDITIONAL 30% off \$70, we do $70 \times 0.3=21$.

$70 - 21 = \$49$.

QUESTION 3

Which of the following represents the most accurate passageway for air in humans?

- A. Mouth –andgt; Pharynx –andgt; Trachea –andgt; Bronchi –andgt; Bronchioles –andgt; Alveoli
- B. Mouth –andgt; Pharynx –andgt; Alveoli –andgt; Bronchi –andgt; Bronchioles
- C. Mouth –andgt; Esophagus –andgt; Bronchi –andgt; Bronchioles –andgt; Alveoli

D. Mouth –andgt; Pharynx –andgt; Larynx –andgt; Esophagus –andgt; Alveoli –andgt; Bronchi

E. Mouth –andgt; Alveoli –andgt; Bronchi –andgt; Trachea

Correct Answer: A

This is the most correct answer choice.

QUESTION 4

The coexistence of solid, liquid and gas in thermodynamic equilibrium is called:

A. Melting point

B. Triple point

C. Condensation point

D. Equilibrium point

E. Coexisting point

Correct Answer: B

This is indeed the definition of what a triple point is.

QUESTION 5

134 is what percent of 335?

A. 25

B. 35

C. 40

D. 45

E. 55

Correct Answer: C

For this (and other similar problems), it is basically asking, what percent of 335 will give 134. From the answer choices, you can already eliminate anything over 50% as 134 is clearly less than half of 335, and you can tell 134 will definitely fit into 335 less than 4 or so times, thus eliminating 25%. This leaves you with 3 answer choices.

Begin the process of elimination by multiplying the answer choice percentages by the given 335 and pick the one that gives the provided benchmark (134).

Answer choice (35) will give: $0.35 \times 335 = 117.25$. Answer choice (40) will give: $0.40 \times 335 = 134$
