QUESTION 1

Is this the re-enrollment process when an administrator resets multifactor authentication (MFA) factors for end users?

Solution: End users must reset passwords by sending an email before enrolling in another factor

- A. Yes
- B. No

Correct Answer: A

QUESTION 2

Is this an option available to end users for self-service password reset if enabled by an Okta Administrator?

Solution: Email

- A. Yes
- B. No

Correct Answer: A

Explanation: 1. Click on the password reset link
Include a Click here to reset your password link on the Okta Sign-On page so that users can intuitively initiate the password reset flow. By combining self-service password resets with SSO, not only can organizations reduce the number of required passwords (a security benefit, as well as end-user convenience) but users are able to access all their applications through a single password reset.

2.

Receive either an email or an SMS message
The user has the option to receive either an email or an SMS message containing a password reset code. With both options, the user still has to answer a security question to verify identity before they are allowed to reset their password. This security question and answer is created when users enroll in Okta MFA.

3.

Enter a new password
The newly created password can still impose the same password policies such as character length, number of special characters required, etc., ensuring a consistent password policy throughout the organization.

QUESTION 3

An end user account has been changed from an Active Directory mastered user to an Okta mastered user. Is this what the end user must do upon the next login?

Solution: Change email address on user profile

- A. Yes

B. No

Correct Answer: B

QUESTION 4

Is this a valid reason to choose Okta as an Identity and Access Management (IAM) solution? Solution: To serve as an API gateway

A. Yes

B. No

Correct Answer: B

QUESTION 5

An Okta Administrator configured the factor enrollment policy to require Okta Verify as a factor and Google Authenticator and Voice Call Authentication as optional factors

Is this what happens when an end user authenticates with Okta?

Solution: The end user has a choice among multiple factors to use when authenticating if more than one factor is configured.

A. Yes

B. No

Correct Answer: B
