QUESTION 1

DRAG DROP

Given the graphic, match each stage of the cyber-attack lifecycle to its description.

Select and Place:

reconnaissance		attacker will plan the cyber-attack
weaponization		attacker will determine which method to use to compromise an endpoint
delivery		attacker will distribute their weaponized payload to an endpoint
exploitation		attacker will trigger a weaponized payload
installation		escalate privileges on a compromised endpoint
command and control		establish secure communication channel to servers across the internet to reshape attack objectives

Correct Answer:

	reconnaissance	attacker will plan the cyber-attack	
	weaponization	attacker will determine which method to use to compromise an endpoint	
	delivery	attacker will distribute their weaponized payload to an endpoint	
	exploitation	attacker will trigger a weaponized payload	
	installation	escalate privileges on a compromised endpoint	
	command and control	establish secure communication channel to servers across the internet to reshape attack objectives	

QUESTION 2

An Administrator wants to maximize the use of a network address. The network is 192.168.6.0/24 and there are three subnets that need to be created that can not overlap. Which subnet would you use for the network with 120 hosts?

Requirements for the three subnets:

Subnet 1: 3 host addresses

Subnet 2: 25 host addresses

Subnet 3: 120 host addresses

A. 192.168.6.168/30

B. 192.168.6.0/25

C. 192.168.6.160/29

D. 192.168.6.128/27

Correct Answer: B

QUESTION 3

SecOps consists of interfaces, visibility, technology, and which other three elements? (Choose three.)

A. People

B. Accessibility

C. Processes

D. Understanding

E. Business

Correct Answer: ACE

The six pillars include:

1.

 Business (goals and outcomes)

2.

 People (who will perform the work)

3.

 Interfaces (external functions to help achieve goals)

4.

 Visibility (information needed to accomplish goals)

5.

 Technology (capabilities needed to provide visibility and enable people)

6.

 Processes (tactical steps required to execute on goals) All elements must tie back to the business itself and the goals of the security operations

QUESTION 4

Which characteristic of serverless computing enables developers to quickly deploy application code?

A. Uploading cloud service autoscaling services to deploy more virtual machines to run their application code based on user demand

B. Uploading the application code itself, without having to provision a full container image or any OS virtual machine components

C. Using cloud service spot pricing to reduce the cost of using virtual machines to run their application code

D. Using Container as a Service (CaaS) to deploy application containers to run their code.

Correct Answer: B

"In serverless apps, the developer uploads only the app package itself, without a full container image or any OS components. The platform dynamically packages it into an image, runs the image in a container, and (if needed) instantiates the underlying host OS and VM and the hardware required to run them."

QUESTION 5

Which type of malware takes advantage of a vulnerability on an endpoint or server?

A. technique

B. patch

C. vulnerability

D. exploit

Correct Answer: A
