100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Palo Alto Networks Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

A customer has serverless functions that are deployed in multiple clouds.

Which serverless cloud provider is covered by "overly permissive service access" compliance check?

- A. Alibaba
- B. GCP
- C. AWS
- D. Azure

Correct Answer: C

---

### QUESTION 2

What are two key requirements for integrating Okta with Prisma Cloud when multiple Amazon Web Services (AWS) cloud accounts are being used? (Choose two.)

- A. Super Administrator permissions
- B. A valid subscription for the IAM security module
- C. An Okta API token for the primary AWS account
- D. Multiple instances of the Okta app

Correct Answer: BD

---

#### QUESTION 4

What is the most reliable and extensive source for documentation on Prisma Cloud APIs?

- A. [prisma.pan.dev](https://prisma.pan.dev)
- B. [docs.paloaltonetworks.com](https://docs.paloaltonetworks.com)
- C. Prisma Cloud Administrator's Guide
- D. Live Community

Correct Answer: A

<https://prisma.pan.dev/api/cloud/>

---

#### QUESTION 5

The development team is building pods to host a web front end, and they want to protect these pods with an application firewall. Which type of policy should be created to protect this pod from Layer7 attacks?

- A. The development team should create a WAAS rule for the host where these pods will be running.
- B. The development team should create a WAAS rule targeted at all resources on the host.
- C. The development team should create a runtime policy with networking protections.
- D. The development team should create a WAAS rule targeted at the image name of the pods.

Correct Answer: D

Image is the correct way of scoping the rule. Although host and image can be used to scope the rule. but the host can have other application pods which can be none web apps. scoping based on Image will make sure the rule only applies to the containers created from the web image.
