QUESTION 1

How does the Policy Optimizer policy view differ from the Security policy view?

A. It provides sorting options that do not affect rule order

B. It specifies applications seen by rules

C. It displays rule utilization

D. It details associated zones

Correct Answer: A

QUESTION 2

Which update option is not available to administrators?

A. New Spyware Notifications

B. New URLs

C. New Application Signatures

D. New Malicious Domains

E. New Antivirus Signatures

Correct Answer: B

QUESTION 3

What in the minimum frequency for which you can configure the firewall too check for new wildfire antivirus signatures?

A. every 5 minutes

B. every 1 minute

C. every 24 hours

D. every 30 minutes

Correct Answer: B

WildFire	Provides near real-time malware and antivirus signatures created as a result of the analysis done by the WildFire public cloud. WildFire signature updates are made available every five minutes. You can set the firewall to check for new updates as frequently as every minute to ensure that the firewall retrieves the latest WildFire signatures within a minute of availability. Without the WildFire subscription, you must wait at least 24 hours for the signatures to be provided in the Antivirus update.

QUESTION 4

To what must an interface be assigned before it can process traffic?

A. Security Zone

B. Security policy

C. Security Protection

D. Security profile

Correct Answer: A

QUESTION 5

A server-admin in the USERS-zone requires SSH-access to all possible servers in all current and future Public Cloud environments. All other required connections have already been enabled between the USERS- and the OUTSIDE-zone. What configuration-changes should the Firewall-admin make?

A. Create a custom-service-object called SERVICE-SSH for destination-port-TCP-22. Create a security-rule between zone USERS and OUTSIDE to allow traffic from any source IP-address to any destination IP-address for SERVICE-SSH

B. Create a security-rule that allows traffic from zone USERS to OUTSIDE to allow traffic from any source IP-address to any destination IP-address for application SSH

C. In addition to option a, a custom-service-object called SERVICE-SSH-RETURN that contains source-port-TCP-22 should be created. A second security-rule is required that allows traffic from zone OUTSIDE to USERS for SERVICE-SSHRETURN for any source- IP-address to any destination-Ip-address

D. In addition to option c, an additional rule from zone OUTSIDE to USERS for application SSH from any source-IP-address to any destination-IP-address is required to allow the return-traffic from the SSH-servers to reach the server-admin

Correct Answer: B
