Following Questions and Answers are all new published by Palo Alto Networks Official Exam Center

QUESTION 1

What is the correct process tor creating a custom URL category?

A. Objects > Security Profiles > URL Category > Add

B. Objects > Custom Objects > URL Filtering > Add

C. Objects > Security Profiles > URL Filtering > Add

D. Objects > Custom Objects > URL Category > Add

Correct Answer: D

QUESTION 2

Which two Security profile actions can only be applied to DoS Protection profiles? (Choose two.)

A. Reset-server

B. Reset-both

C. SYN cookies

D. Random Early Drop

Correct Answer: CD

QUESTION 3

According to the best practices for mission critical devices, what is the recommended interval for antivirus updates?

A. by minute

B. hourly

C. daily

D. weekly

Correct Answer: C

Reference: https://docs.paloaltonetworks.com/pan-os/8-1/pan-os-admin/threat- prevention/best-practices-for-content-and-threat-content-updates/best-practices-mission- critical.html

QUESTION 4

An address object of type IP Wildcard Mask can be referenced in which part of the configuration?

A. Security policy rule

B. ACC global filter

C. external dynamic list

D. NAT address pool

Correct Answer: A

You can use an address object of type IP Wildcard Mask only in a Security policy rule. https://docs.paloaltonetworks.com/pan-os/9-0/pan-os-web-interface-help/objects/objects- addresses IP Wildcard Mask --Enter an IP wildcard address in the format of an IPv4 address followed by a slash and a mask (which must begin with a zero); for example, 10.182.1.1/0.127.248.0. In the wildcard mask, a zero (0) bit indicates that the bit being compared must match the bit in the IP address that is covered by the 0. A one (1) bit in the mask is a wildcard bit, meaning the bit being compared need not match the bit in the IP address that is covered by the 1. Convert the IP address and the wildcard mask to binary. To illustrate the matching: on binary snippet 0011, a wildcard mask of 1010 results in four matches (0001, 0011, 1001, and 1011).

QUESTION 5

What is used to monitor Security policy applications and usage?

A. Security profile

B. App-ID

C. Policy-based forwarding

D. Policy Optimizer

Correct Answer: D
