QUESTION 1

A developer has to identify a method in an Apex class that performs resource intensive actions in memory by iterating over the result set of a SOQL statement on the account. The method also performs a DML statement to save the changes to the database.

Which two techniques should the developer implement as a best practice to ensure transaction control and avoid exceeding governor limits? Choose 2 answers

- A. Use the Database.Savepoint method to enforce database integrity.
- B. Use the System.Limit class to monitor the current CPU governor limit consumption.
- C. Use the @ReadOnly annotation to bypass the number of rows returned by a SOQL.
- D. Use Partial DML statements to ensure only valid data is committed.

Correct Answer: AB
