QUESTION 1

Which governor limit applies to all the code in an apex transaction?

- A. Elapsed CPU time
- B. Number of new records created
- C. Number of classes called
- D. Elapsed SOQL query time

Correct Answer: A

QUESTION 2

A developer wrote a unit test to confirm that a custom exception works properly in a custom controller, but the test failed due to an exception being thrown. What step should the developer take to resolve the issue and properly test the exception?

- A. Use Test.isRunningTest() within the customer controller.
- B. Use database methods with all or none set to FALSE.
- C. Use the finally block within the unit test to populate the exception.
- D. Use try/catch within the unit test to catch the exception.

Correct Answer: D

QUESTION 3

Which two statements are true about using the @testSetup annotation in an Apex test class? Choose 2 answers

- A. Records created in the test setup method cannot be updated in individual test methods.
- B. The @testSetup annotation is not supported when the GisTest(SeeAllData=True) annotation is used.
- C. Test data is inserted once for all test methods in a class.
- D. A method defined with the @testSetup annotation executes once for each test method in the test class and counts towards system limits.

Correct Answer: BD

QUESTION 4

Which user can edit a record after it has been locked for approval? (Choose 2)

- A. Any user with a higher role in the hierarchy
- B. A user who is assigned as the current approver
- C. Any user who approved the record previously
- D. An administrator

Correct Answer: BD

QUESTION 5

A developer has two custom controller extensions where each has a save() method.

```
<apex:page standardController="Account", extensions="ExtensionA, ExtensionB">  
  <apex:commandButton action="{!save}" value="Save"/>  
</apex:page>
```

Which save() method will be called for the following Visualforce page?

- A. ExtensionA save()
- B. ExtensionB save()
- C. standard controller save()
- D. Runtime error will be generated

Correct Answer: D
