QUESTION 3

An application that generates auto insurance quotes allows users to add a substitute transportation reimbursement option to their coverage. Users who add this option are required to select one of three reimbursement levels:

-

Up to $10/day

-

Up to $25/day

-

Up to $50/day

You must configure a form to add a check box that allows users to select the substitute transportation reimbursement option. Users selecting this option are presented with three reimbursement levels as a set of radio buttons, similar to the following example.

How do you configure the UI to present users with the set of reimbursement levels only if the user selects the reimbursement option?

A. Add a refresh when condition on the check box control.

B. Add a validate rule to the flow actions.

C. Add a visible when condition on the radio button control.

D. Add a validate rule to the check box control.

Correct Answer: C

QUESTION 4

You have designed a decision tree that you want to unit test. You want to test various input values to ensure that you get the expected results. How would you unit test your decision tree?

A. Run the decision tree and enter values on the test page.

B. Check the decision tree for completeness.

C. Check the decision tree for conflicts.

D. Add the decision tree to a decision shape in your application and create cases using various input values.

Correct Answer: A

QUESTION 5

While testing a form, you need to verify the contents of a data page in memory. Which tool do you use to view the current contents of the data page?

A. The Tracer

B. The Data Explorer

C. The Clipboard tool

D. Live UI

Correct Answer: C
