QUESTION 1

BigCo has two development projects currently in progress developed by independent teams. One team builds the Quoting application. Another team builds the Policy Administration application. Development takes place on different servers

with separate rulebases.

The Quoting application is built on the Policy Administration application.

The Policy Administration application requires enhancements to support other areas of the business.

The Quoting team is notified when the Policy Administration application is versioned. The Quoting team responds by importing a HAP containing the new version.

Select the two best practices to minimize potential development conflicts and work with the most current version of the Policy Administration application. (Choose Two)

- A. Periodically rebase the Policy Administration application.
- B. Switch between applications when modifying rules.
- C. Perform branch reviews when merging branches.
- D. Share rulesets between both applications.

Correct Answer: CD

QUESTION 2

BigCo receives complaints from existing customers and new prospects that BigCo representatives contact them with irrelevant offers and products. Which two Pega solutions do you suggest to help solve this problem? (Choose Two)

- A. Pega Marketing
- B. Pega Customer Service
- C. Robotic Process Automation
- D. Customer Decision Hub

Correct Answer: AD

QUESTION 3

XYZ Corp users are experiencing delays in the application that you suspect is related to the database.

Which two options do you recommend to isolate the issue? (Choose Two)

- A. Write Pega logs to the database server.

- B. Investigate when the database is used most heavily.
- C. Lower query-time-related alert thresholds.
- D. Increase the threshold for blob-size alerts.

Correct Answer: BC

QUESTION 4

An end user of the application experienced a browser crash while working on a highly available system. Crash recovery is enabled. Does the user to be reauthenticated?

- A. Yes, if the user is directed to the same node.
- B. No, if the user is directed to a different node.
- C. Yes, If the authentication cookie was lost.
- D. No, if the authentication cookie was lost

Correct Answer: C

QUESTION 5

Security policies need to be configured for a newly developed Pega application using basic credential authentication. The lockout policy configuration must lock out users after three failed login attempts. The configuration must exclude Administrator or Executive operators from the lockout.

How do you achieve this requirement?

- A. Define operator override setting in enterprise authentication system
- B. Create a separate role for Admin Executives
- C. Use Exclude Operators options in Security Policies landing page
- D. Define Access Control Policy to exclude Admin Executives

Correct Answer: A
