Select and Place:

Correct Answer:

QUESTION 4

XYZ, Inc. is multinational software interested in deploying a worldwide application as soon as possible. The application currently does not have requirements that depend on its user\\'s geographical region. An outside consultant suggested that the application initially be generated with a framework and implementation layer.

Which three questions do you ask to validate the outside consultant\\'s recommendation? (Choose Three)

A. Can the framework layer instead consist of multiple built-on applications?

B. How many languages and locales must the application eventually support?

C. Is there a reason why this decision cannot be made at a later time?

D. Is there an intent to market the framework layer to other companies?

E. What is the name of the first division or region that uses the application?

Correct Answer: ACD

QUESTION 5

You isolated the problem to node 1 of the cluster. You see node 1 goes down shortly after 3:00 p.m. every day with an out-of-memory error. Which two alerts typically precede this condition?(choose two)

A. PEGA0004 ?uantity of data received by database query exceeds limit

B. PEGA0001 ?HTTP interaction time exceeds limit

C. PEGA00017 ?Cache exceeds limit

D. PEGA0002 ?Connect operation time exceeds limit

Correct Answer: BC

Explanation: Six weeks after you deliver your application to production, you users report that the application slows down in the afternoon. The application is almost completely unresponsive for some users shortly after 3:00 P.M. Other users

do not experience this problem until later in the day.

You do not have access to the Production environment, but you do have access to AES. The production environment has three nodes and a load balancer. You need to resolve this issue because a new division of the organization will start

using the application next month.
