QUESTION 1

XYZ Corp users are experiencing delays in the application that you suspect is related to the database.

Which two options do you recommend to isolate the issue? (Choose Two)

- A. Write Pega logs to the database server.
- B. Investigate when the database is used most heavily.
- C. Lower query-time-related alert thresholds.
- D. Increase the threshold for blob-size alerts.

Correct Answer: BC

QUESTION 2

DRAG DROP

In the Answer Area, drag each use case on the left to the appropriate locking strategy on the right.

Select and Place:

	Answer Area										
Subcase data entry is completely independent of other users	<table border="1"><thead><tr><th>Use Case</th><th>Locking Strategy</th></tr></thead><tbody><tr><td></td><td>Do not lock parent</td></tr><tr><td></td><td>Default locking</td></tr><tr><td></td><td>Customize lock string</td></tr><tr><td></td><td>Optimistic locking</td></tr></tbody></table>	Use Case	Locking Strategy		Do not lock parent		Default locking		Customize lock string		Optimistic locking
Use Case	Locking Strategy										
	Do not lock parent										
	Default locking										
	Customize lock string										
	Optimistic locking										
Data entry may only be performed on one subcase at a time											
A property value restricts updates to a single case at a time											
Agent updates to subcases are never restricted											

Correct Answer:

	Answer Area										
	<table border="1"><thead><tr><th>Use Case</th><th>Locking Strategy</th></tr></thead><tbody><tr><td>Subcase data entry is completely independent of other users</td><td>Do not lock parent</td></tr><tr><td>Data entry may only be performed on one subcase at a time</td><td>Default locking</td></tr><tr><td>A property value restricts updates to a single case at a time</td><td>Customize lock string</td></tr><tr><td>Agent updates to subcases are never restricted</td><td>Optimistic locking</td></tr></tbody></table>	Use Case	Locking Strategy	Subcase data entry is completely independent of other users	Do not lock parent	Data entry may only be performed on one subcase at a time	Default locking	A property value restricts updates to a single case at a time	Customize lock string	Agent updates to subcases are never restricted	Optimistic locking
Use Case	Locking Strategy										
Subcase data entry is completely independent of other users	Do not lock parent										
Data entry may only be performed on one subcase at a time	Default locking										
A property value restricts updates to a single case at a time	Customize lock string										
Agent updates to subcases are never restricted	Optimistic locking										

**QUESTION 3****DRAG DROP**

Select and move the five steps required to implement single sign-on (SSO) authentication in a pega application to the SSO authentication implementation steps column. (choose five)

Select and Place:

Step Options

- Create a ruleset to hold all the rules.
- Exclude the new ruleset from the application ruleset stack.
- Select the external authentication check box on the operator form.
- Create the Authentication activity.
- Update the Browser requestor type. Specify the new access group.
- Create an access group with a new ruleset specified under the Advanced tab.
- Set the Applies to class of authentication activity to @baseclass.

SSO Authentication Implementation Steps

-
-
-
-
-

Correct Answer:

Step Options

- Exclude the new ruleset from the application ruleset stack.
-
-
-
- Set the Applies to class of authentication activity to @baseclass.

SSO Authentication Implementation Steps

- Select the external authentication check box on the operator form.
- Create the Authentication activity.
- Update the Browser requestor type. Specify the new access group.
- Create an access group with a new ruleset specified under the Advanced tab.
- Create a ruleset to hold all the rules.

QUESTION 4

Which two actions can you perform to improve the guardrails compliance score of an application? (Choose two)

- A. Ensure keyed data classes are not mapped to pr-other where possible.
- B. Convert activities that only retrieve data to data transforms that invoke data pages.

C. Achieve a higher application level test coverage percentage score.

D. Increase the percentage of unit tests and scenario tests that pass.

Correct Answer: AB

QUESTION 5

Finco corporation uses pega to perform the majority of the mortgage underwriting tasks.

After gathering the initial data, the mortgage case pauses and waits for the credit report.

The credit report is a separate case, located in the same class group as the mortgage case, and typically resolves within 24 hours. After the credit report is complete, the application routes the mortgage case to the specialist.

Which of the following options is the optimal solution to route the mortgage case to the specialist when the credit report is complete?

A. Add a wait shape to the mortgage flow with a case dependency to advance the mortgage flow to the next assignment when the credit report case is resolved.

B. Insert a credit report assignment in the mortgage flow with a SLA to check the status of the credit report case and call the ResumeFlow activity when the credit report case completes.

C. Include a split join shape in the mortgage flow to include the credit report flow. Use the All option on the split join shape to ensure the credit report is complete before routing to the specialist.

D. Modify the credit report flow to move the mortgage case to the specialist. The application routes the assignment to the specialist with the least amount of work.

Correct Answer: A
