QUESTION 1

XYZ Corp users are experiencing delays in the application that you suspect is related to the database.

Which two options do you recommend to isolate the issue? (Choose Two)

- A. Write Pega logs to the database server.
- B. Investigate when the database is used most heavily.
- C. Lower query-time-related alert thresholds.
- D. Increase the threshold for blob-size alerts.

Correct Answer: BC

QUESTION 2

A Pega application locally stores the same set of codes defined by and used within an external system of record. The Page application does not locally store the labels associated to these codes. During case processing, the displayed labels for this set of codes are sourced from the external system of record. On any given day, the label associated to a code may change. You are asked to implement a report definition that displays the current label associated to each code whenever the report is run.

How do you design a Pega application to meet this requirement?

- A. Develop a SQL function that calls a stored procedure to retrieve the currently associated level for each code.
- B. Persist the most recently retrieved labels for each code in a local table. Join to that table when running the report.
- C. Query the distinct codes that the report would display. Develop an interface to retrieve the associated labels in bulk.
- D. Display report definition rows using a custom section. Use a Keyed-access Data Page to source label values.

Correct Answer: A

QUESTION 3

Users in a cloud-based production application report a chronic performance issue that occurs every day between 2:00 P.M. and 4:00 P.M. All attempts to reproduce the problem in the Development, QA, and Staging environments have failed. Which two techniques help you troubleshoot the problem? (Choose Two)

- A. Review Performance Alerts and Exceptions in PDC
- B. Review a Production Tracer Log using SMA
- C. Review Alerts and Exceptions using PLA.
- D. Review Performance Alerts and Exceptions in AES.

Correct Answer: AC

QUESTION 4

Identify the two correct statements regarding Localization wizard capabilities. (Choose Two)

- A. Extracts the string values from all application field values, paragraphs, and correspondence records.
- B. Creates field value rules for all labels used in the application.
- C. Automatically sets the locale, base currency, and time zones based on the user's language.
- D. Generates a package for French even though Pega provides an associated language pack.

Correct Answer: CD

QUESTION 5

APP Studio created a data type in the Organization layer for Quote data called BCO-Data-Quote. How do you help users find rules from this data class when working in APP Studio?

- A. Create a BCO-QI-Data-Quote class that inherits from BCO Data-Quote.
- B. Use a Data Reference to configure the rules that you need from the BCO Data Quote class.
- C. Copy the fields in the data class to the BCO-QT Work- class so all subclasses can see the Quote rules.
- D. Select each rule you want to reuse in the application as a relevant record.

Correct Answer: D
