### QUESTION 3

During application discovery of a Clarify application, you determine that the user accesses more than one customer case concurrently within the application, which creates multiple windows of the same type. This requires you to enable the UseKeys property on an application's object.

Based on the image that shows the application and the matched controls in the Object Explorer, which control's UseKeys property must be set to True?

- A. ClarifyCRM
- B. MdiClient
- C. \_Case\_1
- D. Control

Correct Answer: A

#### QUESTION 4

You are assigned to develop a set of activities using a popular HR application. The application loads after you start interrogation from Pega Robot Studio, but you notice that you are unable to use the Robot Studio Interrogator to drag and drop over the desired controls.

Why are you unable to interrogate the desired application controls?

- A. The StartMethod on the adapter is set to StartAndWait, but the TargetPath property is undefined.
- B. The StartMethod on the adapter is set to MonitorAll, but the path property is undefined.
- C. The StartMethod on the adapter is set to Start, but the TargetPath property is undefined.
- D. The adapter's StartOnProject property is set to false.

Correct Answer: D

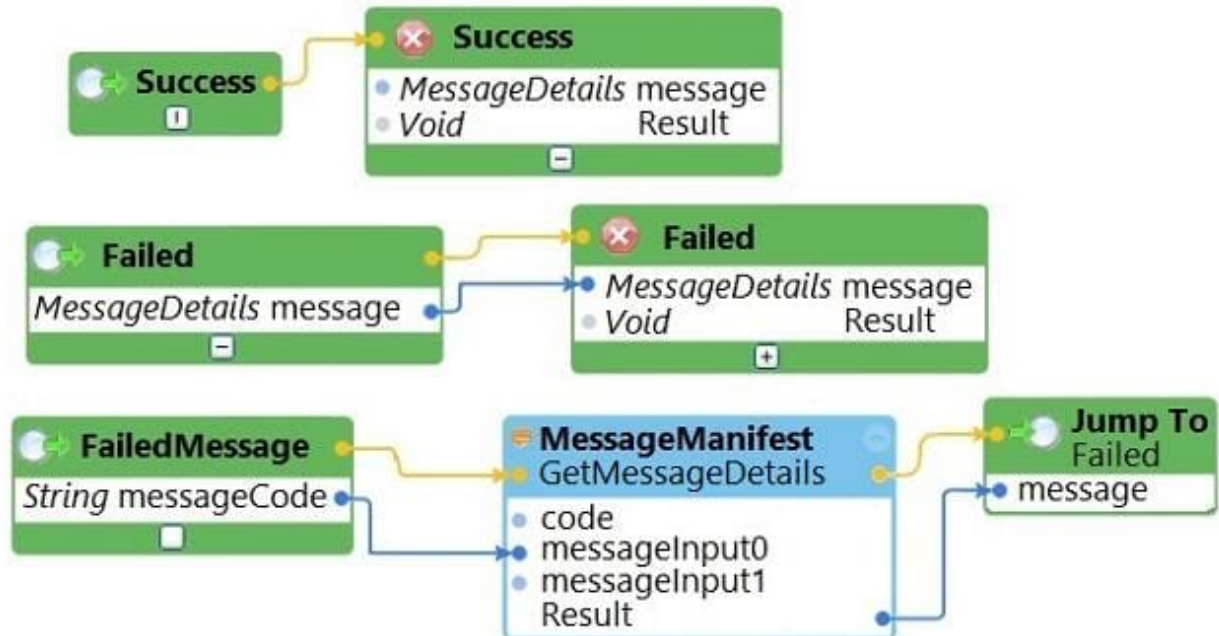

#### QUESTION 5

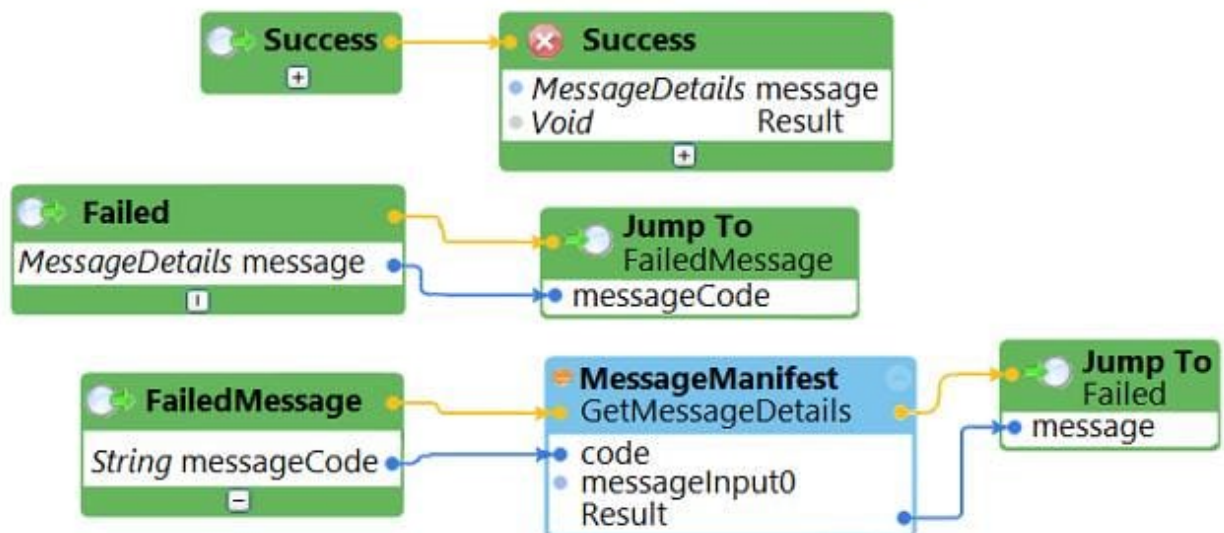

The business requirements states that the login automation creates a Success or Failed response when attempting to log in to the finance application. If a failure occurs, the automation should pass a message code with the Message Manifest before exiting the automation.

Which image represents the exit logic?

A.

B.
