Content	Correspondence Configuration
Add JSP tags to an email	**Source** / Insert Property / Insert Rule
Reproduce a part of a form in the correspondence	Source / Insert Property / **Insert Rule**
Reference the LastName property in the correspondence	Source / **Insert Property** / Insert Rule

QUESTION 3

You are developing a case type to process visa applications. As part of the process, applicants need to schedule an interview with the consulate. A child Interview case is created for the interview process and assessment. Following the interview, it typically takes 48 hours for the consulate to reach a decision. For the visa case to proceed to applicant notification, the Interview case needs to be resolved.

How do you configure a case type to achieve the required behavior?

A. Add a Create Case step that creates the Interview child case. There is no need to add a Wait step.

B. Add a Create Case step that creates the Interview child case. Following this step, add a Wait step that pauses the parent case until the interview case reaches a status of Resolved and after 48 hours have elapsed.

C. Add a Create Case step that creates the Interview child case. Following this step, add a Wait step that pauses the parent case until 48 hours have elapsed.

D. Add a Create Case step that creates the Interview child case. Following this step, add a Wait step that pauses the parent case until the Interview case reaches a status of Resolved.

Correct Answer: C

QUESTION 4
