QUESTION 3

An order fulfillment case type allows a customer to update user profile information during the order placement stage. The user profile consists of the following three pages: Account ID and password Customer contact information A list of open orders with status of each order

How do you configure the case type to allow customers to update any of the user profile pages at any time during case processing?

- A. Add a set of optional actions to the case workflow.
- B. Add an alternate stage to the case life cycle.
- C. Add an optional process to the case workflow.
- D. Add a button for each profile page to each assignment.

Correct Answer: A

QUESTION 4

An on-demand transportation application has a Conversation preference data type. When customers use the application to request a ride, they can specify their conversation preference: whether they would like to talk to their driver or if they would prefer silence. Company stakeholders are interested in analyzing the conversation preference data.

How is the Conversation preference data type sourced?

- A. Local system of record
- B. No system of record
- C. External system of record

Correct Answer: C

QUESTION 5

A hotel booking application allows customers to change rooms after making a reservation. The status of each room in each hotel is stored on a data page sourced from a database table. Which two configuration options do you use to update the database table when a customer changes rooms? (Choose two.)

- A. A When rule to trigger the database update
- B. An editable data page containing the room information
- C. A savable data page containing the room information
- D. A data transform to copy updates to the data page

Correct Answer: BD
