QUESTION 1

While testing a form, you need to verify the contents of a data page in memory. Which tool do you use to view the current contents of the data page?

- A. Case Designer
- B. The Data Explorer
- C. The Clipboard tool
- D. Live UI

Correct Answer: C

QUESTION 2

A manager requests a report that contains the following columns: Create Date, Case ID, Create Operator, and Work Status. You must sort the cases so the case with the most recent create date appears at the top of the list and descends in order.

How do you design the report definition to support this requirement?

- A. Add a filter condition where Create Date is greater than the current date.
- B. Make the Create Date the first column in the report.
- C. Select Highest to Lowest sort type for Create Date.
- D. Select Lowest to Highest sort type for Create Date.

Correct Answer: D

QUESTION 3

A customer views a product available in multiple color options. The customer must select only one color for each product.

Which UI control allows a developer to present the user with all color choices at once, without prompting or clicking, while ensuring that the user can only select one of the color options?

- A. Radio buttons
- B. Text input
- C. Drop-down
- D. Check box

Correct Answer: C

QUESTION 4

An online retailer allows customers to select a courier service for deliveries. The list of available courier services is drawn from a data type sourced in the Pega database. The Fulfillment department wants to allow local warehouse managers to add courier services to mitigate increases in delivery times and remove courier services that fail to meet delivery metrics.

Which two options are required to allow local warehouse managers to update courier service records in production? (Choose two.)

- A. Create an access group for local warehouse managers.
- B. Delegate the records for the courier service data type.
- C. Define an approval process for adding and removing courier services.
- D. Enable rule checkout for the local warehouse managers.

Correct Answer: BC

QUESTION 5

HOTSPOT

In the Answer Area, select the appropriate correspondence configuration for each type of content.

Hot Area:

Content

Add JSP tags to an email

Reproduce a part of a form in the correspondence

Reference the LastName property in the correspondence

Correspondence Configuration

Source
Insert Property
Insert Rule
