QUESTION 3

A customer refund case type requires that an auditor receives an email notification if the refund is greater than twice the price of the item. Which recipient role do you select to configure this requirement?

A. Configure the email to go to a work queue.

B. Configure the email to go to a customer.

C. Configure the email to go to an interested person.

D. Configure the email to go to an owner.

Correct Answer: A

QUESTION 4

A hotel booking application allows customers to change rooms after making a reservation. The status of each room in each hotel is stored on a data page sourced from a database table. Which two configuration options do you use to update the database table when a customer changes rooms? (Choose two.)

A. A When rule to trigger the database update

B. An editable data page containing the room information

C. A savable data page containing the room information

D. A data transform to copy updates to the data page

Correct Answer: BD

QUESTION 5

A process routes loan requests to a specific loan officer based on the type of loan.

If the loan is a mortgage, it is routed to Adam Ross.

If the loan is for an automobile, it is routed to Julia Samuels.

If the loan is an equity line, the case is routed to Don Smith.

How do you configure a router to ensure that case advances to the correct loan officer?

A. Route the case to a worklist using a skilled router.

B. Route the case to a work queue using a When condition.

C. Route the case to a work queue using a skilled router.

D. Route the case to a worklist using a When condition.

Correct Answer: D
