### QUESTION 1

A car insurance quote requires a view for potential customers to enter information to process the request. What are two primary decisions to make before you add fields to the view? (Choose Two)

- A. Is field entry required?
- B. Are processing actions applied to the field?
- C. Does the field require a data source?
- D. How do users enter values into the field?

Correct Answer: BC

---

### QUESTION 2

Which requirement is fulfilled by configuration a field value?

- A. Service agents are able to enter feedback in multiple languages.
- B. A global hotel chain application can display current amenities in 23 languages.
- C. Customers can add an unlimited number of items to an online shopping card.
- D. A government official can enter comments that require location.

Correct Answer: BD

---

### QUESTION 3

Depending upon the purchase request amount, approvals cascade from the users to a loan officer, then to a director and finally to a vice president. The loan officer is the user's manager. The director is the loan officer's manager. The vice president is the director's manager. Which two approaches can you use to configure the cascading approval? (Choose two)

- A. Approval based on Authority Matrix, with a Decision Tree rule to determine the approver(s)
- B. Approval based on Authority Matrix, with a Decision Table rule to determine the approver(s)
- C. Approval based on Reporting structure, using the workbasket manager to determine the approver(s)
- D. Approval based on Reporting structure and when conditions, using each operator's reporting to manager to determine the approver(s)

Correct Answer: CD

---

### QUESTION 4

What are the minimum components of a user interface (UI) action set?

- A. Two actions and one event
- B. One action and one event
- C. One action, one event, and one condition
- D. One action and one condition

Correct Answer: B

---

#### QUESTION 5

A hotel booking application allows customers to change rooms after making a reservation. Each room's status in each hotel is stored on a data page sourced from an external database table.

Which two configuration options, when applied in combination, do you use to update the database table when a customer changes rooms? (Choose Two)

- A. A savable data page that contains the room information
- B. A when rule to trigger the database update
- C. A data transform to copy updates to the data page
- D. An editable data page that contains the room information

Correct Answer: AC
