### QUESTION 1

A hospital uses a case type to manage the treatment of patients visiting the Emergency Room (ER). Cases are created when the patient checks in at the registration desk, and are resolved when the patient is released from the hospital.

Stakeholders identify the following security requirements for the case type.

Patients access cases on a read-only basis.

Patients can only access their own cases.

Doctors and nurses can modify cases throughout the case life cycle.

Only doctors are allowed to write prescriptions.

Which configuration allows doctors and nurses to modify cases while complying with all identified security requirements?

- A. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 5.
- B. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 1.
- C. Create a single access role for both doctors and nurses, and set the modify action to 5.
- D. Create a single access role for both doctors and nurses, and set the modify action to 1.

Correct Answer: A

---

### QUESTION 2

Graduate school students create and submit project proposals to their advisors. During the proposal phase, the advisor and the student can each edit the draft proposal.

How do you ensure the advisor and the student can simultaneously edit the proposal, and the application can check the proposal for changes before committing them?

- A. Configure the locking on the case type to allow one user.
- B. Configure the locking on the case type to allow multiple users.
- C. Configure an assignment for the advisor and an assignment for the student.
- D. Configure the student and advisor roles with view and edit permission.

Correct Answer: B

---
