QUESTION 1

You are updating a system of record using a SOAP connector. If the system of record is unavailable, you want to retry after an hour. If it is still unavailable after an hour, a notification should be sent to a system administrator.

How do you implement this requirement?

A. Implement the logic in the data page\\'s response data transform.

B. Implement the logic in the connector\\'s error handler flow.

C. Customize the standard pxErrorHandlingTemplate data transform.

D. Use a transition condition in the activity step invoking the connector.

Correct Answer: B

QUESTION 2

You want to create a new minor version of an application ruleset to add a new feature to your application. The new feature will be made available to users in a phased rollout.

How do you update the application to add the new ruleset version?

A. Create a branch ruleset and a new application, and add the branch ruleset to the application.

B. Lock and roll the existing ruleset, and create a new application version.

C. Lock and roll the existing ruleset, and update the existing application version.

D. Create a new application version and add the new ruleset version as a production ruleset.

Correct Answer: C
