QUESTION 1

HOTSPOT

You create a canvas app.

The app requires access to data that is stored in collections. The app must provide the following actions:
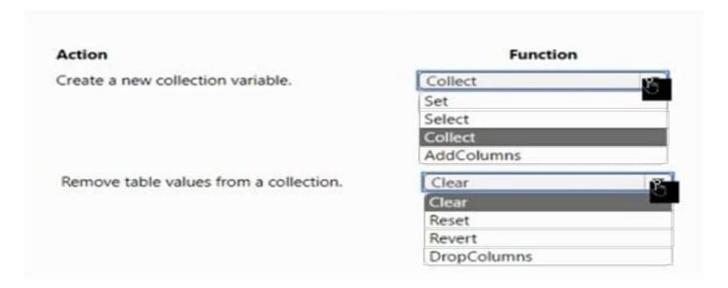

Create a new collection variable.

Remove table values from a collection.

You need to configure functions for the app.

Which functions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Action	Function
Create a new collection variable.	Collect
	Set
	Select
	Collect
	AddColumns
Remove table values from a collection.	Clear
	Clear
	Reset
	Revert
	DropColumns

Correct Answer:

QUESTION 2

You are developing a canvas app.

You need to apply business rules to the app without writing code.

Which three actions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Validate data and show error messages.

B. Enable or disable fields.

C. Set field requirement levels.

D. Set field values.

E. Show or hide fields

Correct Answer: ACD

The following actions are not available on Canvas apps:

1.

Show or hide columns

2.

Enable or disable columns

3.

Create business recommendations based on business intelligence

QUESTION 3

HOTSPOT

You create workflows to automate business processes.

You need to configure a workflow to meet the following requirements:

1.

Be triggered when a condition is met.

2.

Run immediately.

3.

Perform an action when a condition is met.

You need to create a workflow that automatically sends emails based on a mail merge template. To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Workflow Requirement	Configuration Option
Be triggered when a condition is met.	▼
	Publish workflow.
	Subject contains data.
	Trigger when a Power Automate button is pressed.
Run immediately.	▼
	Approve the workflow.
	Configure the workflow to run now.
	Configure child workflow to run now.
Perform an action when a condition is met.	▼
	Send an email.
	View chart.
	Update a security role.

Correct Answer:

Answer Area

Workflow Requirement	Configuration Option
Be triggered when a condition is met.	▼
	Publish workflow.
	Subject contains data.
	Trigger when a Power Automate button is pressed.
Run immediately.	▼
	Approve the workflow.
	Configure the workflow to run now.
	Configure child workflow to run now.
Perform an action when a condition is met.	▼
	Send an email.
	View chart.
	Update a security role.

1) Be triggered when a condition is met - Subject contains data 2) Run Immediately - Configure the workflow to run now
3) Perform an action when a condition is met - send an email

QUESTION 4

HOTSPOT

A company uses Power Apps. You enable auditing in Microsoft Dataverse. Users report the following issues when viewing the audit logs:

Unable to view the read access audit logs.

Unable to view the Account table audit logs.

You need to troubleshoot the issues.

What are the causes of the issues? To answer, select the appropriate options in the answer area.
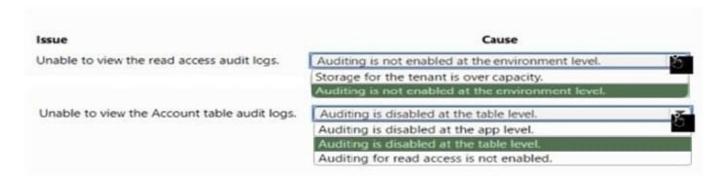

NOTE: Each correct selection is worth one point.

Hot Area:

Issue	Cause
Unable to view the read access audit logs.	Auditing is not enabled at the environment level.
	Storage for the tenant is over capacity.
	Auditing is not enabled at the environment level.
Unable to view the Account table audit logs.	Auditing is disabled at the table level.
	Auditing is disabled at the app level.
	Auditing is disabled at the table level.
	Auditing for read access is not enabled.

Correct Answer:

Issue	Cause
Unable to view the read access audit logs.	Auditing is not enabled at the environment level.
	Storage for the tenant is over capacity.
	Auditing is not enabled at the environment level.
Unable to view the Account table audit logs.	Auditing is disabled at the table level.
	Auditing is disabled at the app level.
	Auditing is disabled at the table level.
	Auditing for read access is not enabled.

QUESTION 5

A company uses Power Apps.

The company plans to create a canvas app that uses a responsive design.

You need to configure the app.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Disable the Scale to fit setting.

B. Configure the height and width properties by using drag handles.

C. Enable the lock orientation setting.

D. Configure the height and width properties by using a formula.

Correct Answer: AD

Create responsive layouts in canvas apps

Disable Scale to fit

You can configure each screen so that its layout adapts to the actual space in which the app is running.

You activate responsiveness by turning off the app\\'s Scale to fit setting, which is on by default. When you turn this setting off, you also turn off Lock aspect ratio because you\\'re no longer designing for a specific screen shape. (You can still

specify whether your app supports device rotation.)

Use formulas for dynamic layout

To create a responsive design, you locate and size each control by using formulas instead of absolute (constant) coordinate values. These formulas express each control\\'s position and size in terms of the overall screen size or relative to

other controls on the screen.
