QUESTION 1

You are developing automation solutions that process sensitive employee data for a company. You plan to implement the sensitive variables feature in Power Automate for desktop.

What are three characteristics of the sensitive variables feature? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You can reference and manipulate variables that are marked as sensitive from within desktop flows.
- B. You can view the value of variables marked as sensitive within desktop flow logs by using the Microsoft Power Platform admin center.
- C. Sensitive variables are not visible within desktop flow logs in the Power Automate portal.
- D. You can mark any variable as sensitive.
- E. Only variables that are passwords can be marked as sensitive.

Correct Answer: ACD

QUESTION 2

You need to address the issue with the capacity planning flow. What should you do?

- A. Increase the CPU and memory of the machine on which the gateway is hosted.
- B. Create a gateway cluster.
- C. Configure the system to send alerts when the gateway fails.
- D. Create a machine group and add machines to the group to handle requests.

Correct Answer: B

According to the scenario, the capacity planning flow fails when the gateway is offline. To avoid this issue, you can create a gateway cluster that consists of two or more gateways that share the same configuration and data sources. This way, if one gateway is offline, another gateway in the cluster can handle the requests and ensure high availability for your flow.

QUESTION 3

DRAG DROP

You are designing automation processes.

You need to configure the run mode for each automation scenario.

Which run modes should you use? To answer, drag the appropriate run modes to the correct scenarios. Each run mode may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Solution types

Unmanaged

Managed

Answer Area

Requirement	Solution type
Deploy a solution to a source control system.	<div></div>
Deploy a solution to a user acceptance testing (UAT) environment.	<div></div>
Deploy a solution to a production environment.	<div></div>
Deploy a solution to another development environment.	<div></div>

Correct Answer:

**Solution types****Answer Area****Requirement****Solution type**

Deploy a solution to a source control system.

Deploy a solution to a user acceptance testing (UAT) environment.

Deploy a solution to a production environment.

Deploy a solution to another development environment.

QUESTION 4**DRAG DROP**

You are developing automation solutions for a company.

You need to use Microsoft Office scripts in a cloud flow to calculate the number of business days between two dates.

Which three actions should you perform in sequence?

To order, answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Answer Area

Configuration setting

Type of trigger to use

	▼
When a new email arrives	
When a new events is created	
When a new row is created or modified	
When a new item is created or modified	

Type of variables to use in the desktop flow to access credentials

	▼
Set	
Input	
Output	
Compose	

Correct Answer:

Answer Area

Configuration setting

QUESTION 5

DRAG DROP

You are developing desktop flows for a company.

You need to use Recorder to record steps that you are performing in target applications.

Which recording modes will Recorder use? To answer, drag the appropriate recording modes to the correct target applications. Each recording mode may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Actions

Map shapes to flow actions.

Create the diagram by using standard flowchart shapes.

Select **Prepare to Export** in the toolbar

Name the flow and select **Create Flow**.

Select **Export to Flow**.

Create the diagram by using BPMN shapes.

Answer Area

Correct Answer:

Actions

Create the diagram by using standard flowchart shapes.

Answer Area

Create the diagram by using BPMN shapes.

Select **Prepare to Export** in the toolbar

Map shapes to flow actions.

Select **Export to Flow**.

Name the flow and select **Create Flow**.
