QUESTION 1

DRAG DROP

You are preparing to create a cloud flow that queries data from a SharePoint list.

You must use different SharePoint lists for the test and production environments.

You need to configure the flow to select the correct SharePoint list for the environment where you deploy the flow.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Answer Area

Requirement

Solution

Trigger the cloud flow.

	▼
instant flow	
scheduled flow	
automated flow	
desktop flow	

Desktop flow connection.

	▼
supervisor's registered machine	
supervisor's registered machine group	
branch shared machine	
supervisor s mobile device	

Run the desktop flow.

	▼
authenticated and unlocked	
authenticated and locked	
unauthenticated	
authenticated school account and locked	

Correct Answer:

Answer Area

Requirement

Solution

Trigger the cloud flow.

	▼
instant flow	
scheduled flow	
automated flow	
desktop flow	

Desktop flow connection.

	▼
supervisor's registered machine	
supervisor's registered machine group	
branch shared machine	
supervisor s mobile device	

Run the desktop flow.

	▼
authenticated and unlocked	
authenticated and locked	
unauthenticated	
authenticated school account and locked	

QUESTION 2

DRAG DROP

You are designing automation processes.

You need to configure the run mode for each automation scenario.

Which run modes should you use? To answer, drag the appropriate run modes to the correct scenarios. Each run mode may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

**Solution types****Answer Area****Requirement****Solution type**

Deploy a solution to a source control system.

Deploy a solution to a user acceptance testing (UAT) environment.

Deploy a solution to a production environment.

Deploy a solution to another development environment.

Correct Answer:

Solution types**Answer Area****Requirement****Solution type**

Deploy a solution to a source control system.

Deploy a solution to a user acceptance testing (UAT) environment.

Deploy a solution to a production environment.

Deploy a solution to another development environment.

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other.

You must minimize the amount of processing time required to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create two sequential Update Row actions.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 4

DRAG DROP

You need to implement a solution to manage the priority of incoming orders.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Train and publish a model.

Use the model in a cloud flow.

Use the model in a desktop flow.

Create a custom form processing model.

Create a collection and add documents to the collection.

Add extracted data to the Microsoft Dataverse table.

Create an object detection model.

Answer Area

Correct Answer:

Actions

Use the model in a desktop flow.

Create an object detection model.

Answer Area

Create a custom form processing model.

Create a collection and add documents to the collection.

Train and publish a model.

Use the model in a cloud flow.

Add extracted data to the Microsoft Dataverse table.

QUESTION 5

HOTSPOT

A company develops an automation solution.

You need to manage the flows. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

You must run one specific flow from the queue after a flow which is currently running completes.

	▼
In the desktop flow queue, select move to top.	
In the desktop flow queue, change the priority.	
In the cloud flow, change the print for the desktop flow action to High.	

You develop an automation. The automation must run at high priority each time it runs.

	▼
In the Desktop flow runs queue, select move to top.	
In the Desktop flow run queue, change the priority.	
In the cloud flow, change the print for the desktop flow action to High.	

Correct Answer:

Answer Area

Requirement

You must run one specific flow from the queue after a flow which is currently running completes.

In the desktop flow queue, select move to top.

In the desktop flow queue, change the priority.

In the cloud flow, change the print for the desktop flow action to High.

You develop an automation. The automation must run at high priority each time it runs.

In the Desktop flow runs queue, select move to top.

In the Desktop flow run queue, change the priority.

In the cloud flow, change the print for the desktop flow action to High.
