QUESTION 1

DRAG DROP

You are developing desktop flows for a company.

You need to use Recorder to record steps that you are performing in target applications.

Which recording modes will Recorder use? To answer, drag the appropriate recording modes to the correct target applications. Each recording mode may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

The screenshot shows the Recorder interface with three columns: 'Recording modes', 'Target application', and 'Recording mode'. The 'Recording modes' column contains three boxes: 'Standard', 'Image based', and 'Web'. The 'Target application' column contains four items: 'Web browser', 'iFrame within a web browser', 'Java applet', and 'Windows application'. The 'Recording mode' column contains four empty boxes, each labeled 'Recording mode'.

Correct Answer:

The screenshot shows the Recorder interface with the correct answer. The 'Recording modes' column contains three boxes: 'Standard', 'Image based', and 'Web'. The 'Target application' column contains four items: 'Web browser', 'iFrame within a web browser', 'Java applet', and 'Windows application'. The 'Recording mode' column contains three boxes: 'Web', 'Image based', and 'Standard'.

QUESTION 2

HOTSPOT

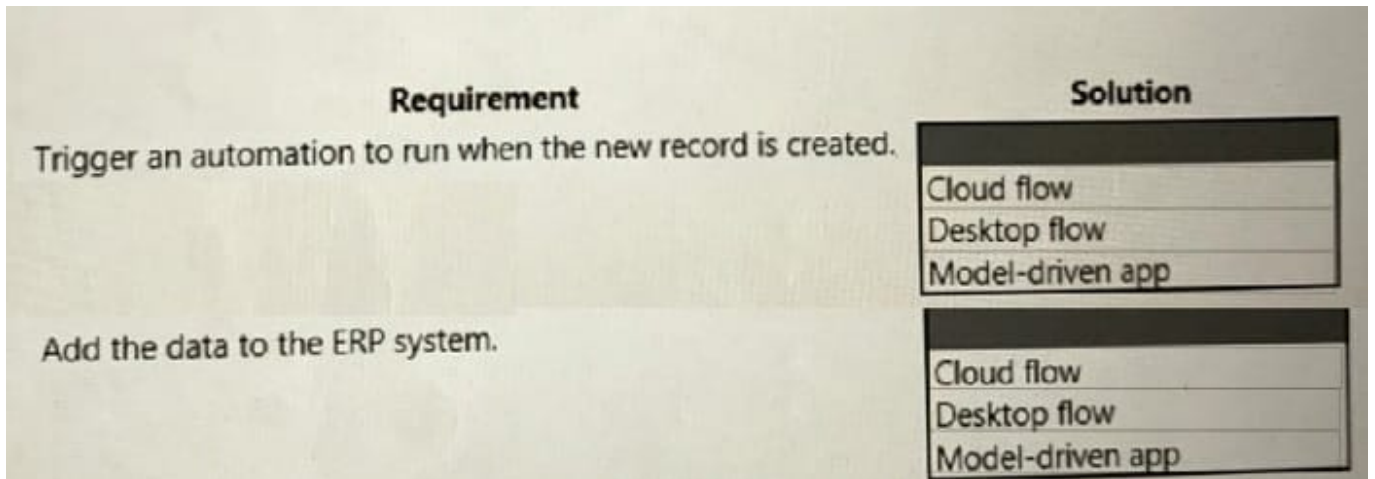

You are creating an automation for a company. When a new record is created in a Microsoft Dataverse table, the automation must add the same data to an enterprise resource planning (ERP) system. The ERP system does not have an API.

You need to create the automation solution.

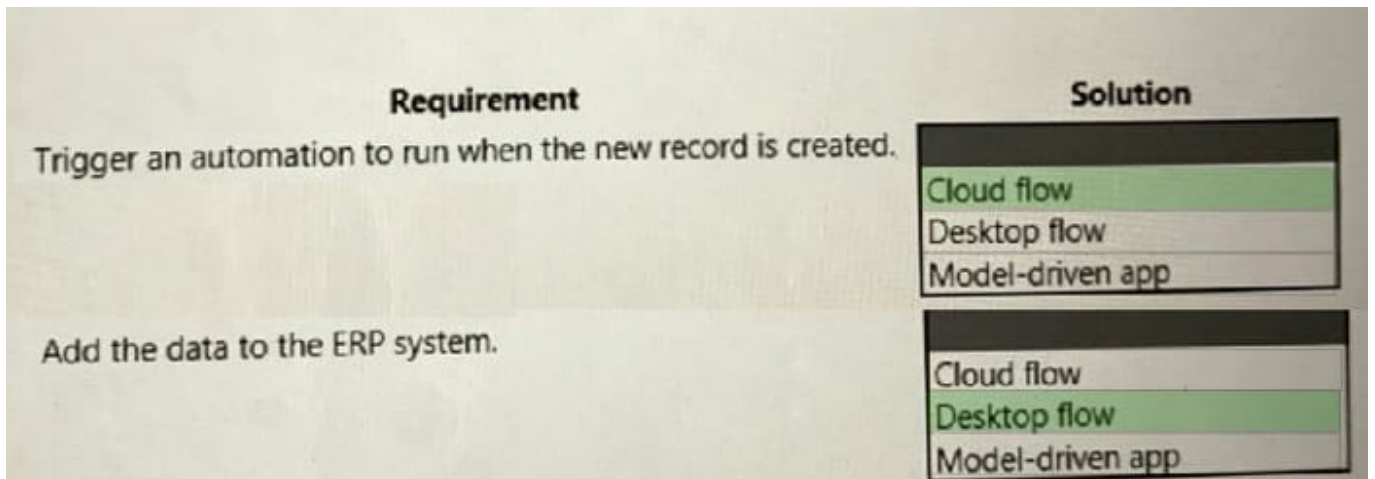

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

QUESTION 3

A company uses Microsoft 365 apps. You are building a flow that is triggered when a new email arrives.

If an email message contains a Microsoft Excel workbook attachment the solution must post the Excel data to an external customer relationship management (CRM) system that runs on a user's workstation. The CRM system is not accessible

by using an API.

You need to design the solution.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a desktop flow.
- B. Create desktop flow and define an input variable of type file.
- C. Implement the Retrieve email messages action from a desktop flow.
- D. Implement the When a new email arrives trigger in a cloud flow.
- E. Implement the Create file action from the OneDrive connector in a cloud flow.

Correct Answer: ACD

QUESTION 4

You are developing a Power Automate desktop flow to process new employee documentation. The flow has a variable for confidential bank account numbers.

Users are able to view bank account numbers while the flow is tested.

You need to ensure the bank account numbers are not visible in the flow.

What should you do?

- A. Turn on Secure Inputs in a cloud flow.
- B. Mark the variable as sensitive.
- C. Change the external name.
- D. Mark variables produced as disabled.

Correct Answer: B

QUESTION 5

HOTSPOT

A company develops an automation solution.

You need to manage the flows. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Action
You must run one specific flow from the queue after a flow which is currently running completes.	In the desktop flow queue, select move to top.
	In the desktop flow queue, change the priority.
	In the cloud flow, change the priority for the desktop flow action to High.
You develop an automation. The automation must run at high priority each time it runs.	In the Desktop flow runs page, change the priority.
	In the Desktop flow run queue, change the priority.
	In the cloud flow, change the priority for the desktop flow action to High.

Correct Answer:

Requirement	Action
You must run one specific flow from the queue after a flow which is currently running completes.	In the desktop flow queue, select move to top.
	In the desktop flow queue, change the priority.
	In the cloud flow, change the priority for the desktop flow action to High.
You develop an automation. The automation must run at high priority each time it runs.	In the Desktop flow runs page, change the priority.
