QUESTION 1

You need to configure the flow for processing invoices that arrive in the AP mailbox.

Which three elements should you use?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Document type
- B. Location
- C. Pages
- D. AI model
- E. Form type
- F. Form

Correct Answer: ACD

When you add a Predict action to cloud flow, you can configure the Model, Document type, Document, and Pages. Location is not a property.

QUESTION 2

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other. You must minimize the amount of processing time required to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create a do until loop.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

You are creating automation solutions for a company. You create a cloud flow that includes a Scope action. What is the purpose of the Scope action?

- A. Run a group of actions based on conditional input.

- B. Group actions together and ensure that all actions succeed or fail as a group.
- C. Run a group of actions based on input from a switch statement
- D. Terminate a flow run.

Correct Answer: B

QUESTION 4

You need to package the automations. What should you do?

- A. Show dependencies within the solution.
- B. Remove unmanaged layers.
- C. Add required components to each item within the solution.
- D. Add existing components to the solution.

Correct Answer: C

QUESTION 5

You have an automation solution that uses a desktop flow. The flow reads data from a file that is stored on a user's machine and writes the data to an application. You import the solution to an environment that is connected to another user's machine.

The user reports that the flow fails. An alert indicates that the path to a file does not exist.

You confirm that the file present on the user's desktop.

You need to resolve the issue.

What should you do?

- A. Use the Get Windows environment variable action to read the USERNAME environment variable and use the value in the path to the user's desktop.
- B. Change access rights for the file to allow read operations for the PAD process.
- C. Move the file to the user's OneDrive storage.
- D. Change the access rights for the file to allow read operations for the current user.

Correct Answer: A
