QUESTION 1

A company uses two separate unlinked apps to manage sales leads: a Power Apps app and a third-party application. The client has the following requirements:

1.

 Manage all leads by using the Power Apps app.

2.

 Create a lead in the Power Apps app when a user creates a lead in the third-party application.

3.

 Update leads in the Power Apps app when a user updates a lead in the third-party application.

4.

 Connect to the third-party application by using an API.

You need to recommend strategies to integrate the Power Apps app and the third-party application.

Which three options can you use to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Dual-write

B. Custom connector

C. Dataflow

D. Power Automate cloud flow

E. Common Data Service connector

Correct Answer: ADE

A: Customers should be able to adopt business applications from Microsoft and expect they speak the same language and seamlessly work together. Dual Write allows our customers to not think about these apps as different systems to write to independently; rather, the underlying infrastructure makes it seamless for these apps to write simultaneously.

D: Use Custom APIs to create your own APIs in Dataverse. With a Custom API you can consolidate a group of operations into an API that you and other developers can call in their code. The Common Data Service (current environment) connector enables calling Custom APIs actions in Power Automate.

E: Common Data Service provides access to the environment database on the Microsoft Common Data Service. It is available for Logic Apps, Power Automate, and Power Apps.

QUESTION 2

DRAG DROP

You need to recommend solutions to meet the organization\\'s communication needs.

What should you recommend? To answer, drag the appropriate technologies to the correct groups of users. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

| Issue	Solution
Users often encounter a character limit when entering data.	▼
	Define a data mask.
	Define and implement duplicate detection rules.
	Define the data type and format for each column.
The database includes multiple instances of some records.	▼
	Define requirements for data entry.
	Define and implement duplicate detection rules.
	Define the data type and format for each column.

Correct Answer:

Answer Area

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	▼ Team access Privacy preference Field security profile Hierarchy security profile
Allow only approved device types to access the solution and company data.	▼ Endpoint security Compliancy policy Conditional access Mobile threat integration

Box 1: Microsoft Teams

First up employees must be able to contact each other by using a secure system to ask and answer questions about medical cases.

Microsoft Teams key capabilities:

1.

Connected

2.

Secure

3.

Managed

4.

Collaborative and productive

Box 2: Microsoft 365 Business Voice

Workers must be able to communicate in near real-time with worker support agents.

Microsoft 365 Business Voice makes it easy for small and medium organizations to turn Microsoft Teams into a powerful and flexible telephone system. It\'s a replacement for traditional telephony providers and in-house phone systems that

can be difficult and costly to manage.

QUESTION 3

HOTSPOT

You need to recommend a collaboration tool for each group.

Which tool should you use? To answer, select the appropriate tool in the answer area.

NOTE: Each correct selection is worth one point.
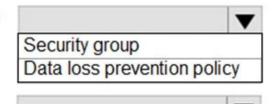

Hot Area:

Answer Area

Requirement	Feature
Restrict sharing of data between Power Automate connectors	▼ Security group Data loss prevention policy
Ensure that environment administrators only see users who require access in the enabled user list.	▼ Security group Data loss prevention policy

Correct Answer:

Answer Area

Requirement	Feature
Restrict sharing of data between Power Automate connectors	▼ Security group **Data loss prevention policy**
Ensure that environment administrators only see users who require access in the enabled user list.	▼ **Security group** Data loss prevention policy

Box 1: Microsoft Teams

Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.

Box 2: Dynamics 365 Workspace

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.

The Expense management mobile workspace lets users capture and upload a receipt, so that they can attach it to an expense report later.

QUESTION 4

HOTSPOT

A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.

The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.

The company needs the following custom table relationships defined:

1.

Associate educators with a list of their professional qualifications.

2.

Assign a primary educator to each course that is held.

3.

Collect information about every course that is held.

You need to determine the type of relationship that best fits the requirement.

Which type of table relationship should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Actions

Visualize processes.
Share processes.
Identify automation recommendations.
Analyze processes.
Prepare processes and recordings.

Answer area

1	
2	
3	
4	
5	

Correct Answer:

Actions

Answer area

1	Prepare processes and recordings.
2	Analyze processes.
3	Visualize processes.
4	Identify automation recommendations.
5	Share processes.

Box 1: One-to-many relationship

Each educator can have 0, 1, or many qualifications Box 2: One-to-many relationship Each educator can be the primary educator for 0, 1 or many cources.

Box 3: Many-to-many relationship that uses a custom table.

Note: N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships

QUESTION 5

HOTSPOT

You are designing a Microsoft Power Platform solution for a company.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Actions

Import the solution in the production environment.

Create an incremental refresh schedule.

Update the production connection information.

Add dataflows to the solution.

Create a data integration project.

Steps

Correct Answer:

Actions

Update the production connection information.

Create a data integration project.

Steps

Create an incremental refresh schedule.

Add dataflows to the solution.

Import the solution in the production environment.

Box 1: Business rule

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: Power Automate flow

Trigger the Power Automate flow with "When a record is updated", then add a Condition in the flow and configure it with Status Label equals to Won.
