QUESTION 1

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

	Yes	No
A Microsoft Power Platform environment must contain a Microsoft Dataverse database.	<input type="radio"/>	<input type="radio"/>
An app created in an environment can only connect to the data sources that are deployed in the same environment.	<input type="radio"/>	<input type="radio"/>
Microsoft Dataverse for Teams environments are automatically created for all members of the team when you create a Microsoft Power Platform app in Microsoft Teams.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

	Yes	No
A Microsoft Power Platform environment must contain a Microsoft Dataverse database.	<input type="radio"/>	<input checked="" type="radio"/>
An app created in an environment can only connect to the data sources that are deployed in the same environment.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft Dataverse for Teams environments are automatically created for all members of the team when you create a Microsoft Power Platform app in Microsoft Teams.	<input checked="" type="radio"/>	<input type="radio"/>

An app can connect to data sources that are not within the same env such as outside/external data sources. it can only connect to a Dataverse within the same environment but other data sources can be external

QUESTION 2

You are using the Power BI service to view a visual on a report that has been shared with you.

You need to add the visual to a dashboard as a tile.

Which action should you perform?

- A. Copy
- B. Spotlight
- C. Export data
- D. Pin

Correct Answer: D

An entire report page can be pinned to a dashboard, which is called pinning a live tile. It's called a live tile because you can interact with the tile on the dashboard.

Unlike with individual visualization tiles, changes made in the report are automatically synced with the dashboard.

<https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboard-pin-tile-from-report>

QUESTION 3

DRAG DROP

You are implementing a solution for an animal hospital.

The animal hospital must contact owners regarding their pets.

You need to model the owner and pet object information by using Microsoft Dataverse. The solution must minimize the amount of customization required:

1.
owner first name
2.
owner last name
3.
owner email address
4.
owner date of birth
5.
pet name
6.
pet breed
- 7.

pet owner

Which component should you use? To answer, drag the appropriate components to the correct data. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Select and Place:

Standard Dataverse table	The owner object
Custom Dataverse table	The pet object
Column	The owner's email address
Relationship	Reference a pet record as belonging to an owner record

Correct Answer:

Standard Dataverse table	The owner object
Custom Dataverse table	The pet object
Column	The owner's email address
Relationship	Reference a pet record as belonging to an owner record

QUESTION 4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
Sharing a model-driven app with a user is the only security required for users to access the app.	<input type="radio"/>	<input type="radio"/>
You can change the order of the columns in a view once you have created and published a view.	<input type="radio"/>	<input type="radio"/>
System views must be shared for everyone to view them.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
Sharing a model-driven app with a user is the only security required for users to access the app.	<input checked="" type="radio"/>	<input type="radio"/>
You can change the order of the columns in a view once you have created and published a view.	<input type="radio"/>	<input checked="" type="radio"/>
System views must be shared for everyone to view them.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 5

DRAG DROP

You need to read data from a Microsoft Excel file into Microsoft Dataverse and then copy that data into an enterprise resource planning (ERP) system.

You need to configure the connector.

What should you use? To answer, drag the appropriate operations to the correct actions. Each operation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Operations

Trigger

Business process flow

Action

Business rule

Answer Area

Action

Operation

Import into Microsoft Dataverse.

Synchronize data to ERP system.

Correct Answer:

Operations

Business process flow

Business rule

Answer Area

Action

Operation

Import into Microsoft Dataverse.

Trigger

Synchronize data to ERP system.

Action

Trigger: Import into Microsoft Dataverse.

Action: Synchronize data to ERP system.

The task is to read data from a Microsoft Excel file and import it into Microsoft Dataverse, and then synchronize that data with an enterprise resource planning (ERP) system.

To accomplish this, you would use the "Import into Microsoft Dataverse" operation as the trigger, which initiates the process of reading data from the Excel file and importing it into Dataverse.

Once the data is imported into Dataverse, you would use the "Synchronize data to ERP system" action to copy the data from Dataverse and transfer it into the ERP system.

The "Business process flow" and "Business rule" operations are not used in this scenario as they are not needed to accomplish the task of importing data from an Excel file into Dataverse and synchronizing it with an ERP system.
