QUESTION 1

DRAG DROP

A manufacturing company is evaluating AI Builder.

You need to select AI Builder models to address specified requirements.

Which model types should you use? To answer, drag the appropriate model types to the correct requirements. Each model type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

prediction	Identify products without labels or serial numbers.
form processing	
object detection	Identify customers who might not pay their invoices on time.

Correct Answer:

	Identify products without labels or serial numbers.
form processing	object detection
	Identify customers who might not pay their invoices on time.
	prediction

**QUESTION 2****HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Yes No

Security roles are modified in Microsoft Azure Active Directory

☐☐

Security Roles are assigned to each table.

☐☐

Correct Answer:

Yes No

Security roles are modified in Microsoft Azure Active Directory

☐☒

Security Roles are assigned to each table.

☐☒**QUESTION 3****DRAG DROP**

A company is building a Power Apps Portal.

You need to select page components.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

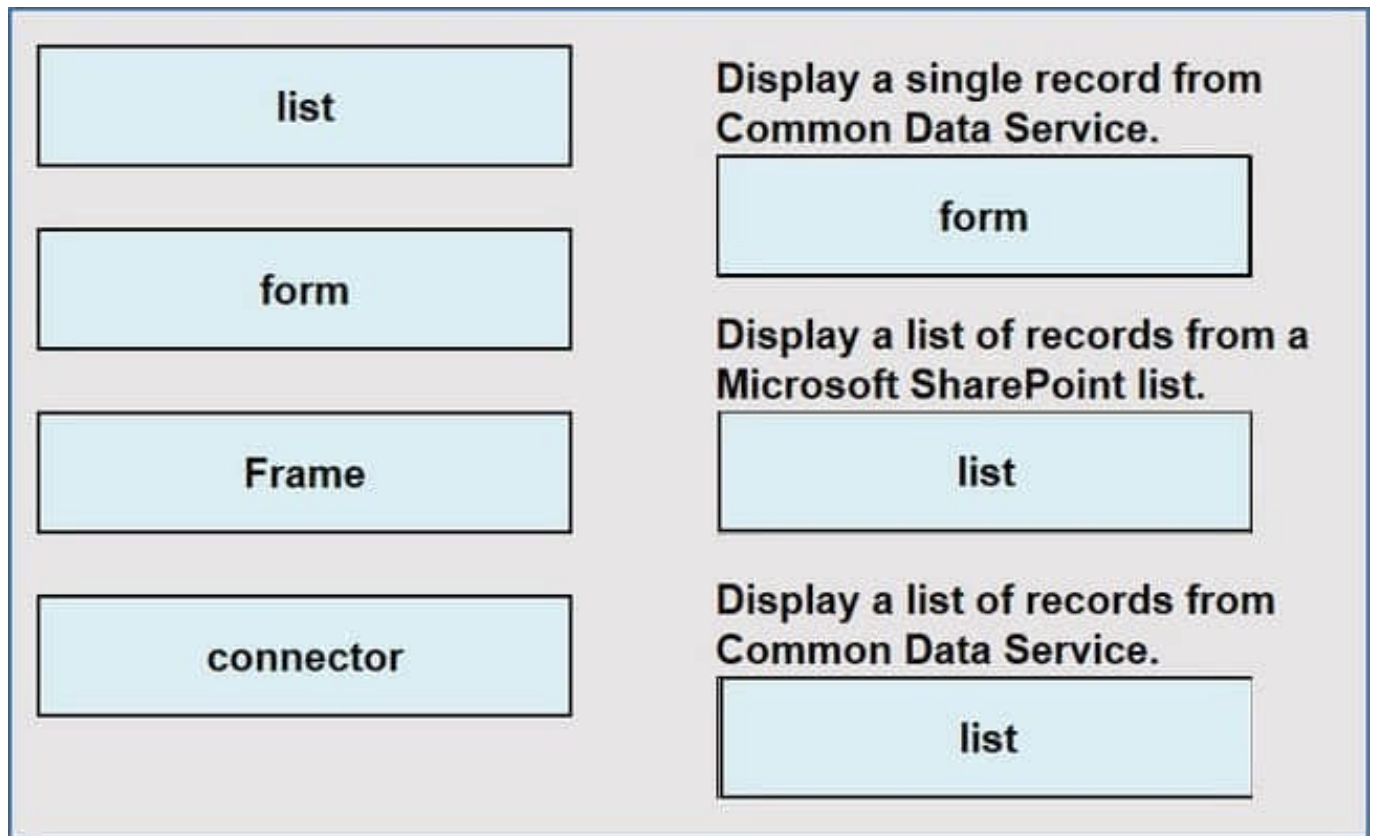

NOTE: Each correct selection is worth one point.

Select and Place:

list	Display a single record from Common Data Service.
form	
Frame	Display a list of records from a Microsoft SharePoint list.
connector	
	Display a list of records from Common Data Service.

Correct Answer:

The "form" component is typically used to display the details of a single record, such as a contact or an account, in a structured and organized way, allowing users to view and edit the information. This makes it an ideal choice for displaying a single record from Microsoft Dataverse, as it allows users to view and edit the information in a clear and intuitive way.

The "list" component, on the other hand, is used to display a collection of records in a tabular or grid format, such as a list of contacts or accounts. This makes it an ideal choice for displaying a list of records from a Microsoft SharePoint list or Microsoft Dataverse, as it allows users to view and interact with a large number of records in a compact and easy-to-navigate format.

IFrame is used to embed external website or pages into your portal, and connector is used to connect your portal with other systems.

QUESTION 4

A company uses Dynamics 365 Supply Chain Management and Dynamics 365 Finance.

Account data must be synchronized between the two system.

You need to ensure that the synchronized data is stored in one place.

What should you use?

A. Azure IoT Central

- B. Azure Active Directory
- C. SQL Server
- D. Common Data Service

Correct Answer: D

Reference: <https://docs.microsoft.com/en-us/power-platform/admin/data-integrator>

QUESTION 5

DRAG DROP

A team of five people plans to create Power Platform solutions for a company. Team members plan to initially use Power Platform trial instances to create solutions.

Team members have questions about how many Power Platform instances and Common Data Service databases they need.

You need to respond to the team.

How should you respond? To answer, drag the appropriate responses to the correct questions. Each response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Responses	Answer Area
One per user	Question
One per tenant	How many trial instances must the team create?
One per environment	How many Common Data Service databases must the team create?
One per Power Platform app	
	Response
	Response
	Response

Correct Answer:

Responses	Answer Area
One per user	Question
One per tenant	How many trial instances must the team create?
One per environment	How many Common Data Service databases must the team create?
One per Power Platform app	
	Response
	One per environment
	One per environment
