### Control action

	Continue performing a set of actions unless a condition becomes true.	Do until
Apply to each	Allow multiple branches to be created based on a set of options.	Switch
	Allow two branches to be created based on a true/false condition.	Condition

Box 1: Do until

The Do Until control in Power Automate is a loop that repeatedly forces an action until a certain condition becomes true.

Box 2: Switch

In Power Automate, a Switch case action is a control function that allows for expression or variable to change the flow

behavior. Where switch case has multiple cases which include different action or block of statement.

Box 3: Condition

#### QUESTION 4

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.

You need to recommend a solution for the coworker.

What should you recommend?

- A. Create a custom connector.
- B. Ask the outside source to send you the data once a week.
- C. Use Microsoft Flow to connect to the database.
- D. Open a ticket with Microsoft and request a new connector.
- E. Use Microsoft Azure Service Bus.

Correct Answer: A

There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector. Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.
