QUESTION 1

Which of the following is a weakness of an Adaptive PMLC Model?

- A. Does not waste time on non-value-added work
- B. Does not waste time planning uncertainty
- C. Cannot identify what will be delivered at the end of the project
- D. Avoids all management issues processing scope change requests

Correct Answer: C

QUESTION 2

What can be described as "one or two written sentences; a series of conversations about the desired functionality."

- A. User Story
- B. Story point
- C. Epic
- D. Product roadmap

Correct Answer: A

QUESTION 3

A legal department representative contacts the scrum master because, while the project's budget has been maintained, it has exceeded its original contracted time and scope. What should the scrum master do?

- A. Meet with the team to gain alignment with the legal department's need to stay within the contracted time and scope
- B. Work with the customer to narrow the scope
- C. Share the project's trajectory with the legal department
- D. Meet with the legal department to help them understand that the customer and the team are satisfied with the time and deliverables

Correct Answer: A

QUESTION 4

- A. Measure of product backlog items (PBI) remaining
- B. Measure of quality of features delivered in an iteration

- C. Measure or required effort to complete an iteration
- D. Measure of the effectiveness of the retrospective meeting

Correct Answer: D

QUESTION 5

An agile team is planning the next iteration for a product release that has accumulated technical debt.

What should the team do?

- A. Add code cleanup activities to the product backlog and request prioritization by the product owner
- B. Add code cleanup activities to the next iteration and request clarification from the product owner
- C. Add code cleanup activities to the next iteration and ask the product owner to end the current iteration
- D. Add code cleanup activities to the next release backlog and request documentation from the product owner

Correct Answer: B
